

Environmental Services

We are responsible for a wide range of services including recycling and household waste sites, rubbish collection, street cleansing, grass cutting, food and health, pest control, dog wardens, environmental action teams—who investigate environmental complaints and provide educational work on littering and graffiti—and car parking.

There is a specific section on the our website about recycling and waste which can be found by going to www.leeds.gov.uk/recycleforleeds. You can search for your bin collection days and find out what can be recycled and where, as well as finding out what's new in the world of recycling and waste.

Further information on the work of the Health and Environmental Action Service can be found on the website under Environmental Health.
