

A65 Kirkstall Road Quality Bus Initiative - Scheme Update 3 - December 2009

Following on from the scheme update in October 2009, the detailed design was completed at the end of November.

The project contractor, Carillion, has prepared an up to date cost for construction of the scheme which has allowed the final Full Approval submission to be sent to the Department for Transport.

The Full Approval submission is in the form of a "Major Scheme Business Case" which has been prepared by a specialist consultant, Aecom, in association with Leeds City Council and Metro.

Subject to Full Approval being granted, construction is programmed to commence in February 2010.
