Leeds Local Development Framework

Natural Resources and Waste DPD – Policy Position Report

January – March 2010

This response form is for your views on the Leeds Natural Resources and Waste DPD Policy Position Report.

You should read the full document or summary document before filling in this form.

The Report, Appendix and Mapbook are available to view at all libraries and One Stop Centres across the Leeds District, at the Development Enquiry Centre, or online at www.leeds.gov.uk/ldf under 'current consultations'. Alternatively email ldf@leeds.gov.uk or ring 0113 247 8075 for more information.

Consultation forms must include a name and address otherwise your comments will not be taken into account.

Your details

Title	<input type="text"/>
Name	<input type="text"/>
Organisation	<input type="text"/>
Address	<input type="text"/>
Tel/Mobile	<input type="text"/>
Email	<input type="text"/>

Natural Resources and Waste DPD Policy Position Report, Jacobs UK, 1 City Walk, Leeds, LS11 9DX

Personal information provided as part of a representation cannot be treated as confidential as the Council is obliged to make representations available for public inspection. However, in compliance with the Data Protection Act 1998 the personal information you provide will only be used by the Council for the purposes associated with the LDF consultations

		Yes	No
SPATIAL OBJECTIVES			
1.	Do you agree with the spatial vision and objectives?		
LAND USE			
2.	Do you agree that policies are needed to ensure the efficient use of previously developed land?		
3.	Do you agree that we should encourage more tree planting and resist healthy tree and vegetation loss when development takes place?		
4.	Do you agree that railway sidings and canal wharves which are, or could be, used to enable the transportation of minerals and/or waste materials by rail and canal should be safeguarded for that purpose ?		
MINERALS			
5.	Do you agree that we should protect mineral resources from development that would prevent them being used in the future and that existing mineral reserves should be safeguarded to reduce pressure for new sites to be exploited?		
6.	Mineral-related activities are often located in general industrial areas and we want to make sure that these locations are not lost to other uses. For this reason we propose to safeguard existing mineral-related sites (these are shown as B1 sites on Maps A1 and A2). Do you agree with this approach?		
7.	Do you agree that we should find alternative uses for quarries, once they are exhausted, such as nature conservation or recreation, rather than filling them with landfill waste first?		
WATER RESOURCES			
8.	Do you agree with the measures that we have suggested for minimising water consumption? Do you have any further suggestions?		
9.	Do you agree with the measures that we have suggested to reduce flood risk? Do you have any further suggestions?		
AIR QUALITY			
10.	Do you think planners should be able to require that developments include measures for improving air quality?		
11.	We are investigating whether it would be beneficial to create Low Emission Zones in some areas of the District. These would be areas where the more polluting vehicles would not be permitted. Do you think this is a good idea?		
ENERGY			
12.	Do you agree that Leeds needs to do significantly more to encourage energy production from renewable energy sources?		
13.	Do you agree that we need to encourage wind energy provision but consider the impacts on local landscape, built-up areas, nature conservation, highway safety, aeronautical radar and transmission mast reception?
