This report, and information or advice which it contains, is provided by Jacobs UK Limited solely for internal use and reliance by its Client in performance of Jacobs UK Limited duties and liabilities under its contract with the Client. Any advice, opinions, or recommendations within this report should be read and relied upon only in the context of the report as a whole. The advice and opinions in this report are based upon the information made available to Jacobs UK Limited at the date of this report and on current UK standards, codes, technology and construction practices as at the date of this report. Following final delivery of this report to the Client, Jacobs UK Limited will have no further obligations or duty to advise the Client on any matters, including development affecting the information or advice provided in this report. This report has been prepared by Jacobs UK Limited in their professional capacity as Consulting Engineers. The contents of the report do not, in any way, purport to include any manner of legal advice or opinion. This report is prepared in accordance with the terms and conditions of Jacobs UK Limited contract with the Client. Regard should be had to those terms and conditions when considering and/or placing any reliance on this report. Should the Client wish to release this report to a Third Party for that party's reliance, Jacobs UK Limited may, at its discretion, agree to such release provided that:

- (a) Jacobs UK Limited written agreement is obtained prior to such release, and
- (b) By release of the report to the Third Party, that Third Party does not acquire any rights, contractual or otherwise, whatsoever against Jacobs UK Limited, and Jacobs UK Limited accordingly assume no duties, liabilities or obligations to that Third Party, and
- (c) Jacobs UK Limited accepts no responsibility for any loss or damage incurred by the Client or for any conflict of Jacobs UK Limited interests arising out of the Client's release of this report to the Third Party.

1 Introduction

1.1 Background

The Integrated Waste Strategy for Leeds 2005-2035 was adopted by Leeds City Council (LCC) in October 2006. This followed a six month period of extensive stakeholder and public consultation.

The vision is to create:

'A zero waste city, whereby we reduce, re-use, recycle and recover value from all waste, waste becomes a resource and no waste is sent to landfill'.

The strategy sets out the statutory National and European targets for improving recycling and recovery rates and reducing reliance on landfill. If LCC fail to take action to meet these targets, financial penalties are estimated to be in the order of £178 million by 2020. Meeting the targets is therefore a priority for LCC.

The main targets of this strategy are to:

- Reduce the annual growth in waste to 0.5% per household by 2010 and eliminate growth in waste per household by 2020.
- Achieve a minimum recycling rate of 50% of household waste by 2020.
- Achieve the recovery of value from 90% of household waste by 2020.

The success of delivering this strategy depends on achieving holistic change in reducing waste and creating a more sustainable approach to waste management. Finding sites and obtaining planning permission for new facilities is an integral part of achieving this change and delivering the waste strategy. Key objectives under theme 8 (planning) are:

- Assist and influence waste policy in LDF documents.
- Identify sites and obtain planning permission for municipal waste facilities.
- Explore the development of a Sustainable Energy Resource Park (SERP).

A major element of the overall strategy is to increase the recovery of value from residual waste. Delivering this element of the waste strategy will involve letting a major waste management contract in 2008. Failure to identify a suitable site (or sites) where the residual waste facility is capable of obtaining planning permission and being constructed by 2013 could result in difficulties in securing a successful and competitive tender process, as it would represent a major risk to the contractor. It would also jeopardise the case for obtaining PFI credits from DEFRA (see below), which appears to be the preferred procurement route.

As part of delivering new waste solutions, Local Authorities can apply to the Department for Environment, Food and Rural Affairs (DEFRA) for Private Finance Initiative (PFI) credits towards the funding and procurement of new facilities. As part of this process, authorities must submit an Expression of Interest (EOI) to set out the case why they should be considered for funding. DEFRA has approved the EOI for Leeds.

The next stage of the procurement process is to submit an Outline Business Case (OBC). This requires the Waste Management Authority to undertake a 'Planning

Health Check' to demonstrate that facilities are deliverable in terms of land acquisition and planning considerations before funding is awarded. Specifically, this health check must set out:

- Site strategy in terms of the status of development plan documents.
- Identification of sites.
- Progress in terms of securing sites.

As well as meeting procurement requirements, the City Council needs to ensure the location of the facility is consistent with sustainable waste management objectives and demonstrates that potential impacts on the community are minimised.

1.2 Purpose of the study

The principal purpose and outcome of this study is to complete a city wide 'search and sieving exercise' to identify a suitable site for a SERP or a major residual waste management facility through applying planning selection criteria and comparative assessment. The criteria for the site selection study reflect national, regional and local objectives on waste.

1.3 Overall approach

The stages of the study are:

- **Stage 1:** Using database information and the knowledge from LCC Council Officers to identify an initial list of sites (see Appendix 1). Apply thresholds (e.g. site area) and high level criteria (e.g. Green Belt) to produce a list of sites to be included in the site selection study.
- **Stage 2:** A higher level assessment of potential sites based on paragraphs 17-21 of National Planning Policy Guidance Planning for Sustainable Waste Management (PPS 10) and other relevant guidance from the emerging Regional Spatial Strategy and the adopted Leeds UDP. This produced a short list of potentially suitable sites (see Appendix 3).
- **Stage 3:** More detailed assessments of short listed sites; through applying further criteria from PPS 10, site investigation and comparative assessment. This produced a list of suitable sites to take forward in the OBC and recommended to be identified in appropriate development plan documents.

1.4 Report format

The format of the report is as follows:

- **Chapter 2.0:** Identifies the characteristics of the waste management facilities and defines the requirements for the site selection study.
- **Chapter 3.0:** Sets out planning policy guidance on selecting sites for waste management facilities and the issues to be taken into account by the Waste Planning Authority in promoting sites in development plans and determining future planning applications.
- **Chapter 4.0:** Undertakes a city wide site search and 'sieving exercise' to identify a final list of suitable sites.
- **Chapter 5.0:** Outlines the conclusions for the suitable sites.
- **Chapter 6.0:** Provides recommendations on the way forward.

2 Operational, Layout and Design Considerations

2.1 Introduction

This section sets out the operational requirements of a major waste facility to inform the site selection process.

2.2 Types of facility in a Sustainable Energy Resource Park (SERP)

As stated previously, the aspiration of LCC is to develop an integrated waste management facility known as a Sustainable Energy Resource Park (SERP). The facilities which could be included within a SERP are:

- A residual waste treatment facility. The Outline Business Case is based upon a reference project of an Energy from Waste (EfW) Facility with an estimated capacity of 182,000 tonnes per annum. This would recover energy from the combustion of residual waste (i.e. waste which is not recycled or composted) and would provide either heat and power or a combination of both. The individual site area for such a facility is estimated at between 2.5 and 5 ha. However, it should be noted that no final decision has been taken on the technology and the forthcoming procurement will be neutral on this issue. The site selection study is therefore also intended to identify sites suitable for alternative facilities for treating residual waste such as Mechanical Biological Treatment (MBT) facilities.
- A Materials Recycling Facility (MRF) providing an estimated annual capacity of 131,000 tonnes per annum. This is used to segregate and sort dry recyclable material for onward recycling. It is an essential part of the recycling process to ensure quality in recycled products and to avoid cross contamination. The site area required for the MRF would be at least 1.5ha.
- In Vessel Composting Facility (IVC). This is the breakdown of organic material by bacteria in the presence of oxygen but in an enclosed container (box, bag, state of the art pressurised stainless steel container). IVC is used for wastes such as food. It would require a land area of approximately 1.5-2ha.
- A Household Waste Sorting Site (HWSS) where people can bring a wide range of unwanted household items for recycling, composting or disposal. They are also used to dispose of potentially hazardous household materials such as oils and other unwanted items which must be disposed of in a controlled manner. This would require a site area of 1ha.
- Business development units which enable innovative solutions to be developed for the use of waste products.
- An education and awareness centre relating to environmental, recycling, climate change and other waste related issues. This is an essential component of the SERP concept as promoting education and awareness is a key issue in reducing the generation of waste and promoting recycling.

Research undertaken by Urban Mines on behalf of Leeds City Council has indicated that a total site area of approximately 15ha. is required to deliver all the facilities as a SERP. However, it may be that some elements of the full SERP could be disaggregated and co-located on more than one site. The total amount of land required would also be dependent on the final layout and landscape requirements and specifications. A site area of around 10ha should provide enough land for the main elements of the SERP, such as the residual waste treatment facility, MRF and the education centre.

2.3 Potential traffic generation

A very basic estimate of the number of servicing vehicles (i.e. does not include private car traffic such as employees) which would be generated by a major waste facility such as EfW and MRF has been undertaken by Jacobs. This is based on some generic parameters on vehicle size and assuming servicing traffic would only be generated for 5 days a week. This provides a very approximate indication of the average number of movements which might be generated per day:

- An EfW could generate an average of 116 servicing vehicle trips per day. A trip is defined as a single movement in or out. Therefore, 116 movements equates to 58 round trips to and from the site.
- The MRF could generate an average of 124 servicing vehicle trips per day equating to approximately 62 round trips per day.

2.4 Experience from other planning applications

A complementary piece of work has been undertaken by Jacobs to review five planning applications for Energy from Waste (EfW) facilities determined during the last eight years. In some cases, this involved the development of EfW facilities alongside other waste management operations.

The applications included in this review were:

- Chineham EfW, Basingstoke.
- Marchwood, Hampshire energy recovery facility.
- Hull energy recovery facility.
- Eastcroft extension to an existing EfW, Nottingham.
- Allington Quarry, Maidstone.

Four of the cases were approved subject to conditions and the extension to the Eastcroft facility was refused. Material planning considerations common to these cases were:

- The need for the facility.
- Whether there are any impacts on health both from the operation of the facility and traffic.
- Visual amenity.
- Impact on landscape.
- Highways safety and capacity.
- Compatibility with existing surrounding land uses.
- Environmental and conservation impacts from noise, impact on nature conservation interests and listed buildings.
- Whether the facility would compromise objectives for the surrounding area, including future regeneration.
- Compliance with land use planning policy.

Key findings from this review are:

- The development plan and specific land use allocation of the proposed site is of primary importance. In authorities where Waste Local Plans did not exist, most sites were allocated for industrial uses in the relevant UDP.
- Applications such as Marchwood in Hampshire were planned and integrated with new modern purpose built industrial sites.
- The specific justification for the choice of site is an important aspect of any planning submission/consent.
- Locating the waste proposal within areas already characterised by industrial uses and away from residential areas may reduce the level of public opposition to the choice of site (but not necessarily on other issues such as the choice of technology and perceived health impacts).
- The impact on regeneration objectives is a key issue but is not necessarily approached consistently. For example, the new Hull facility was granted permission although it is located within a regeneration area whilst the extension to the EfW at Eastcroft was rejected on the grounds that it would conflict with regeneration objectives (this is subject to appeal).
- Agreement with regulators on issues such as emissions should be reached before submitting a planning application.
- Highways capacity, noise, landscape impact, air quality and social impacts represent the main environmental issues.
- Economic impacts on existing business activity are also important.
- The choice of technology will need to be fully justified.
- In some cases, the number of public objection regarding potential health implications was high. In each case, however, the local authority rejected these objections as a result of evidence from Health Impact Assessments, commissioned by Health Authorities and the Environment Agency, as well as evidence from the applicant's Environmental Statement. These declared that the objections were unfounded.
- Consultation at key stages of the proposals is essential to achieving a successful outcome.

2.5 Design and layout issues for major waste management facilities

Attitudes towards the development of major waste facilities are often negative. However, innovative design and use of materials, coupled with an open and engaging public consultation exercise, can help to change the perception of such schemes.

The concept for Leeds includes promoting educational awareness and high quality design. It also includes start up units for incubator businesses to manufacture recycled products. Other local authorities have also set up 'recycling shops' where re-used goods or recycled products can be sold.

Design can help allay negative pre-conceptions of waste processes. For example, the Naka Incineration Plant in Hiroshima, Japan, retains the 'shed' type approach but architect Yoshio Taniguchi placed a public footpath through the middle of the plant, in the form of a raised, glass-enclosed walkway. The glass, combined with a sign-posted route through the plant allows people to view how their waste is treated

and to see how much waste is produced. The theory is that if people can see the refuse they produce, this might influence them to produce less.

Imaginative design can also result in the development of a landmark building, attracting visitors in its own right and providing a focus for education on waste management. Visitors can learn about the workings of the waste treatment facility and environmental issues through easy explanations and visual presentations of the waste treatment process and the inside of the facility. Friedensreich Hundertwasser's designs for a district heating system in Spittelau, Austria and Maishima EfW in Osaka are good examples of this. The EfW in the Isle of Man is a further example of using positive design to promote the development.

Project Integra, the integrated waste management strategy in Hampshire, has sought to utilise innovative design to overcome visual impact issues. A particular success has been the Marchwood Energy Recovery Facility, which has moved away from traditional designs and utilised a dome-like design in its construction. There are fewer examples of alternative technologies such as Mechanical Biological Treatment, but the potential for innovative design is equally applicable.

3 Review of planning policy

3.1 Introduction

National planning guidance on waste management is provided by Planning Policy Statement 10 (PPS 10: Planning for Sustainable Management, DCLG, July 2005) and its companion guide (June 2006). The adopted (2004) and emerging Regional Spatial Strategy for Yorkshire and Humber (RSS, 2007 Panel Report) provides regional policy guidance and the saved policies of the Leeds Unitary Development Plan (July 2006) represent the local policy.

A major change in how waste management facilities are planned has been introduced by the Planning and Compensation Act, 2004. New Local Development Frameworks (LDFs) replace the system of UDPs and Local Plans. As part of the LDF, Planning Authorities must also prepare a Waste Development Plan Document (WDPD). The Waste Development Plan Document should set out the number of new waste management facilities which need to be planned for and allocate suitable sites.

Work on the Leeds Natural Resources Development Plan Document, which will incorporate waste development, has recently commenced but this document will not be adopted until 2010. During the transitional period, the existing waste policies of the UDP are saved and will remain as the principal policy consideration along with other relevant DPD's as they are produced (including the Leeds Core Strategy and AAPs) in determining planning applications for waste management facilities until they are replaced by the Natural Resources Development Plan Document.

The 2004 Act also made the RSS part of the statutory development plan and its policies must also be considered in the determination of planning applications.

3.2 PPS 10: Planning for Sustainable Waste Management (July, 2005) and Companion Guide (June 2006)

Paragraph 11 states that Regional Planning Bodies should consider the need for additional waste management capacity of regional or sub-regional significance. The RSS should provide the strategic framework for the preparation of local development framework documents through identifying the waste management facilities required and their appropriate distribution across the region. Paragraph 12 goes on to state that this should include identifying the broad locations where major waste facilities should be accommodated.

Paragraph 16 states that:

'The core strategy of a waste planning authority should set out policies and proposals for waste management in line with the RSS and ensure sufficient opportunities for the provision of waste management facilities in appropriate locations including for waste disposal. The core strategy should both inform and in turn be informed by any relevant municipal waste management strategy. It should look forward for a period of at least ten years from the date of adoption and should aim to look ahead to any longer-term time horizon that is set out in the RSS.'

Paragraphs 17 and 18 provide guidance on identifying land for waste management sites in Development Plan Documents which:

'should identify in development plan documents sites and areas suitable for new or enhanced waste management facilities for the waste management needs of their areas. Waste planning authorities should in particular: - allocate sites to support the pattern of waste management facilities set out in the RSS in accordance with the broad locations identified in the RSS and allocate sites and areas suitable for new or enhanced waste management facilities to support the apportionment set out in the RSS'.

In doing so, waste planning authorities should:

- *be able to demonstrate how capacity equivalent to at least ten years of the annual rates set out in the RSS could be provided;*
- *identify the type or types of waste management facility that would be appropriately*
- *located on the allocated site or in the allocated area, taking care to avoid stifling innovation in line with the waste hierarchy;*
- *avoid unrealistic assumptions on the prospects, for the development of waste*
- *management facilities, or of particular sites or areas, having regard in particular to any ownership constraint which cannot be readily freed, other than through the use of compulsory purchase powers'.*

In terms of searching for suitable sites for waste management facilities, paragraph 20 states that waste planning authorities should:

- *Look at opportunities for on-site management of waste where it arises.*
- *Identify a broad range of locations including industrial sites, looking for opportunities to co-locate facilities together with complementary activities.*

Paragraph 21 states that in deciding which sites and areas should be identified for waste management facilities, waste planning authorities must assess their suitability against the following criteria:

- *The extent to which they support the policies in PPS 10.*
- *The physical and environmental constraints on development, including existing and proposed neighbouring land uses (as set out in Annex E of PPS10).*
- *The cumulative effect of previous waste disposal facilities on the well-being of the local community, including any significant adverse impacts on environmental quality, social cohesion and inclusion of economic potential.*
- *The capacity of existing and potential transport infrastructure to support the sustainable movement of waste and products arising from resource recovery seeking when practicable and beneficial to use modes other than road transport.*
- *Give priority to the re-use of previously developed land.*

Annex E also sets out the following more detailed considerations to the advice provided in paragraph 20:

- *Protection of water resources.*
- *Land instability.*
- *Visual intrusion.*
- *Nature conservation.*
- *Historic environment.*

- *Traffic and access.*
- *Air emissions, including dust.*
- *Odours.*
- *Vermin and birds.*
- *Noise and vibration.*
- *Litter.*
- *Potential land use conflicts.*

Paragraph 7.4 of the companion guide also states that Area Action Plans can be a useful tool for integrating waste management needs with wider spatial concerns. Section 3.6 of the PPS 10 companion guide underlines the potential for Area Action Plans ‘to set out proposals for major new waste management capacity in order to ensure adequate provision’.

3.3 Regional Spatial Strategy

The existing RSS for Yorkshire and the Humber was adopted in December 2004. The Yorkshire and Humber Regional Assembly (YHA) is currently responsible for monitoring RSS and keeping regional planning matters under review. YHA prepared a draft ‘new style’ RSS during 2004 and 2005 and this was published for consultation in January 2006. An independent panel was appointed to hold an Examination in Public in September and October 2006. The Panel Report setting out the findings and recommendations was published on 4 May 2007 and modifications published by the Government Office for the Yorkshire and Humber were published for further public consultation on 28th September, 2007 .

Policy ENV 12 of the latest version of RSS sets out the following regional waste management objectives:

- Plans, strategies, investment decisions and programmes should aim to reduce, re-use, recycle and recover as much waste as possible.
- Local authorities should work with regional partners, including commerce, the Environment Agency, the waste industry, Recycling Action Yorkshire and community groups to ensure the integration of strategies and proposals for sustainable waste management.
- Local authorities should support the urgent provision of a combination of facilities and other waste management initiatives which best meets environmental, social and economic needs based on: moving the management of all waste streams up the hierarchy; achieving all statutory waste management performance targets during the Plan period and managing waste at the nearest appropriate location, where necessary by seeking agreement with neighbouring authorities.

Policy ENV 13 states:

- Waste planning authorities should ensure that adequate sites and facilities are available to manage the quantities of municipal, commercial and industrial, construction and demolition, agricultural, and hazardous waste as set out within the RSS. This includes doubling the capacity of treatment and recovery facilities to deal with commercial and municipal waste by 2020.

Policy ENV 14 states that the following principles should be considered in designating specific sites or areas where criteria based approaches will apply:

- Waste should be managed on the site where it arises, or if not at the nearest appropriate location.
- Facilities should be located in accordance with the Core Approach and the proposed distribution of housing and economic growth.
- In all areas, identification of sites should also take account of the following priority order:
 - Established and proposed industrial sites which have potential for the location of waste management facilities and the co-location of complimentary activities, such as 'resource recovery' or 'sustainable growth parks';
 - Previously developed land, including mineral extraction sites and landfill sites during their period of operation for the location of related waste treatment activities in sustainable locations;
 - Redundant farm buildings and their curtilages.

In summary, paragraph 15.108 states that the primary role of the RSS is to help provide:

'Sufficient opportunities for new waste management facilities of the right type, in the right place at the right time'

3.4 Leeds UDP: Saved policies

Overall support for new waste management facilities is provided by UDP Policy N47 which states:

'Proposals for waste management facilities will be encouraged subject to detailed policies in Chapter A7'

Detailed Waste Policies are contained under Appendices A7. The supporting text in paragraph A7.2.1 states that

'The Council recognises that during the current Plan period (to 2016) it will need to identify and safeguard sites for waste management facilities of different capacities acknowledging the different land use approaches for different waste streams required. Site allocation will most likely be addressed in the new style of Development Plan, but policies contained in this section (A7) will enable the appropriate waste management facilities in the meantime'

A summary of the UDP policies is provided below but this should be read in conjunction with the UDP for their full interpretation and additional guidance. They also need to be considered in the context of PPS 10 and the emerging RSS.

- Policy WM1: Proposals will be assessed in terms of the waste hierarchy, need outweighing harm, proximity principle, self sufficiency and Best Practicable Environmental Option (note this latter requirement is now removed by PPS 10).
- Policy WM2 requires proposals to comply with the waste hierarchy (reduction, reuse, recovery, disposal).
- Policy WM5: All proposals for permanent waste management facilities will be treated as an industrial use of land. Policies which apply to the acceptability of manufacturing and distribution development shall apply equally in all such cases.
- Policy WM6: In determining proposals for waste management facilities, the Council will have regard to the proximity, type and duration of other waste

operations including those outside Leeds and the cumulative effect upon residents and the environment.

- Policy WM8 sets out the detailed planning and environmental considerations which will apply to proposals for waste management development. This includes:
 - timescale of the operation.
 - layout.
 - the use of Combined Heat and Power where a plant produces energy.
 - harm to visual amenity.
 - environmental and amenity including noise, dust, litter, vermin, odour and gas emissions.
 - protection of water resources and the provision of sustainable urban drainage systems.
 - harm to the interests of nature conservation.
 - adequate proposals for design and landscaping
 - highway and access issues.
 - impact on local residents.
 - hours of operation.

Along side the topic specific plan policies there are also a number of general policies which will be used to assess applications for any development. These are also summarised below:

- Policy GP1 states that where land is allocated for a particular use, no other permanent use will be considered appropriate, unless the proposed use is auxiliary to the allocated use or where the allocated use remains the predominant use within a mixed use scheme or that circumstances have materially altered since adoption of the UDP and the suitability of the site for its allocated use is brought in to question.
- Policy GP2 addresses the consideration of applications made on unallocated, vacant or under-used sites, and that such applications will be considered favourably in the context of other plan policies, and any previous permissions granted or refused.
- Policy GP3 states that existing land uses will remain the dominant land use of any area, except where specified on the proposals map, or development is consistent with Green Belt policy. New development will only be permitted where the proposed uses are compatible with existing uses in the area.
- Policy GP5 details the planning considerations that applications must resolve, and also problems that proposals should avoid, for example loss of amenity, pollution, danger to health or life etc. Furthermore proposals must have regard to guidance contained in any relevant planning brief or framework prepared.

3.5 Leeds Local Development Framework

The LDF will replace the existing Unitary Development Plan. It will provide a strategic planning framework for the city, guiding change over the next 15 to 20 years. When adopted, the LDF will form the statutory Development Plan for Leeds.

The LDF is made up of a number of documents. This includes a Core Strategy and Local Development Documents (LDDs). Some of these LDDs, known as Development Plan Documents (DPDs), will have the legal status of a development plan. Documents with this status will guide decisions on planning applications within the area they cover.

An Area Action Plan (AAP) establishes the planning framework for an area of major change and also forms part of an LDF. AAPs set out the distribution of land uses in an area. They also focus upon the implementation of development proposals and provide an important mechanism for ensuring development is of an appropriate scale, mix and quality. Four AAPs are being produced in Leeds.

3.5.1 Aire Valley Leeds Area Action Plan (AVLAAP)

Aire Valley Leeds is a major regeneration initiative being pursued by LCC. Located immediately to the south east of Leeds city centre, the area extends from the Royal Armouries and Clarence Dock, eastwards through Cross Green and Stourton to the M1.

It contains some 440 hectares (800 acres) of potential development land and is expected to provide over 50 per cent of the city's employment growth over the next ten to fifteen years.

The area, which already has more than around 3500 existing businesses could generate an additional 27,000+ jobs, 7000 new homes, major investment in public transport as well as enhanced leisure facilities for new and surrounding communities.

Work on the construction of the new East Leeds Link Road started in November 2006 and should be completed by October 2008. The road is an important catalyst to the regeneration of the Aire Valley and will open up 250 hectares of land for development.

The 3.9km dual carriageway road will run from Junction 45 of the M1 motorway along the line of Pontefract Lane, and the edge of Cross Green Industrial Park and to the rear of the former Copperfields College site. It will connect with Leeds City Centre and its Inner Ring Road stages 6 & 7, the latter of which is also under construction and due for completion in 2008.

Preferred options for the AVLAAP are programmed to be released for consultation by LCC on 5 October, 2007 for a 6 week period.

3.5.2 West Leeds Area Action Plan

The aim of the West Leeds Area Action Plan (WLAAP) is to provide a co-ordinated approach to the spatial planning of neighbourhoods within the West Leeds Gateway Regeneration Area. It aims to provide a framework for sustainable communities in this part of the city and to assist with the delivery of the regeneration/renaissance objectives of LCC and Leeds West Homes.

The AAP covers the area bounded by the Armley Gyratory & the Clyde's Estate to the East, Heights Estate to the West, Tong Road/Wortley Moor Road to the South and Leeds/Liverpool Canal to the North. The area includes the communities of New Wortley, Upper Wortley, Lower Armley, Armley Town Street, the Aviaries and the adjacent commercial areas along Stanningley Road, Tong Road and Carr Crofts.

3.5.3 East and South East Leeds (EASEL) Area Action Plan

Inner East Leeds contains the highest concentration of deprivation in the city. Over 40% of housing is social rented stock, nearly twice the Leeds average. Leeds City Council intends to narrow the gap between the most disadvantaged people and

communities and the rest of the City, through the EASEL Initiative, a combination of physical, social, economic and environmental improvements within the area.

The scale of investment required in the area is beyond any likely availability of public resources. Private sector resources and long-term investment is therefore required. The Council, through partnership with the private sector, aims to take forward the EASEL Regeneration Initiative. The AAP is intended to complement, support and take forward the spatial elements of the EASEL initiative by providing the planning policy approach to deal positively with the needs of both existing and future communities focusing on key objectives.

The Preferred Options document was subject to consultation between 18th June 2007 and 30th July 2007.

3.5.4 City Centre Area Action Plan

The Leeds City Centre Area Action Plan is a Supplementary Planning Document (SPD) for the Leeds local Development Framework. The main purpose for this document is to provide policies and proposals for the development of land within the City centre to be taken into account when deciding Planning Applications. The SPD also provides guidance for the future growth of the city.

Consultation on the Alternative Options for the City Centre Area Action Plan closed on 5 May 2006.

Consultation on the Preferred Options took place from the 16th April to 28th May 2007. Key issues included the size of the city centre, growth of employment and housing, sustainable construction, open space provision, transport and connections to adjoining areas. The results from this consultation have not as yet been published.

3.6 Conclusion

Key policy considerations for the site selection study are:

- PPS 10 is clear that assumptions on selecting sites must be realistic about deliverability and the potential for site acquisition. Compulsory Purchase should only be considered as a last resort.
- Site specific characteristics which must be taken into account are: proximity to the source of waste; impact on economic development prospects; environmental considerations; accessibility and compatibility with surrounding existing and proposed land uses. Where possible, facilities should be located on previously developed land and on sites either previously used or proposed for industrial uses.
- The emerging Yorkshire and Humber Regional Spatial Strategy does not identify specific locations for waste management uses within Leeds but endorses the concept of sustainable energy resource parks and the co-location of waste management facilities on the same or closely linked sites. It also provides strategic support for a significant increase in the number of waste recovery and recycling facilities.
- The saved policies of the UDP do not identify preferred areas of search for new waste management facilities but do support new waste management

facilities provided certain criteria are met. They also provide criteria based policies for assessing individual waste management proposals.

- Although the Local Development Framework for Leeds is at an early stage of production, a number of Area Action Plans are being prepared in advance of the Core Strategy and the Natural Resources Development Plan Document. In the absence of a spatially specific policy in the RSS, a spatially specific UDP policy and an adopted Core Strategy, the Area Action Plans represent the first opportunity for the City Council to identify suitable sites for waste management uses. The sequence of preparing the LDF documents has been set out in the Local Development Scheme and provision for the inclusion of waste issues in Area Action Plans is set out in national guidance on the preparation of Local Development Frameworks (PPS12). During the transition period, the saved policies of the Leeds UDP remain the principal local development plan document until replaced by LDF Documents.

4 Site Selection Study

4.1 Introduction

This chapter outlines the process to identify suitable sites for a SERP or a major waste management facility.

4.2 Stage 1: Identifying sites to be assessed by the site selection study

The following information sources were used to identify an initial list of sites:

- Leeds Unitary Development Plan, Leeds City Council.
- Sites identified from the National Land Use Database return for Leeds.
- Sites identified as part of the Leeds City Council Urban Capacity Study, 2003.
- Interrogation of the Environment Agency waste management license database.
- Ordnance Survey Maps.
- Information obtained from aerial survey databases.

This produced an initial list of over 2000 sites (see Appendix 1). The following criteria were then applied to exclude sites from the site selection study :

- 2.5 hectares is considered to be the minimum size threshold for a major waste facility (as set out in section 3.2). Although the SERP would require a site larger than this (up to 15ha), the location of a residual waste treatment facility and MRF etc on separate but nearby sites cannot be ruled out.
- Any sites within the boundary of the City Centre as defined on the UDP Proposals Map were deleted from the search as this was not considered to be an appropriate strategic location for waste management uses.
- **As advised within Annex E of PPS 10**, sites within or immediately adjacent to nationally designated environmental sites (e.g. Special Sites of Scientific Interest) or buildings of historic interest were removed where it was considered that this had the potential for adverse impacts which could not be mitigated.
- Sites within the Green Belt were also deleted as development could only be justified in very special circumstances.
- Sites currently allocated in the UDP for housing, prestige business parks and major office parks. This is because the UDP policy WM5 advises that any waste management uses will be treated as if they were for manufacturing or distribution purposes.

This process initially identified over 100 possible sites to be considered by the site selection study and these were agreed with LCC. Further refinement of this list occurred subsequently to remove duplication (different data sources meant some sites had appeared more than once but had been given different site descriptions) and by grouping individual sites where they formed one larger site.

This produced a total of 42 sites which were taken forward for assessment at stage 2.

4.3 Stage 2: Producing a short list of potential sites

This next stage required a broad comparative assessment to identify which of these 42 sites should be discounted from the site selection process. The assessment

focused on compatibility with the criteria set out in paragraphs 17-21 of PPS 10 namely:

- Land ownership and deliverability constraints gave an indication of the likelihood that the site could be acquired and planning permission delivered within the procurement time frame.
- Whether the site is previously developed land.
- Surrounding land uses (existing and proposed).
- Strategic accessibility in terms of proximity to the main waste arisings, i.e. sites within the main urban area which are centrally located to serve the whole city are considered to be meet the proximity principle more than those on the edge of the main urban area or outside it in more rural locations.

A 'traffic light assessment' to indicate the suitability of sites against these criteria was used whereby:

- Green indicates that the site is compatible with the criteria.
- Amber indicates that the site may have issues but it may be possible to overcome these, or more investigation is required.
- Red indicates that the site is in conflict with the criteria and it would be unlikely or impossible to overcome this. The site is therefore eliminated from the search process.

A series of workshops were held to assess each site against the individual criteria and to provide an overall 'traffic light' assessment. These workshops involved members of the Jacobs project team, LCC planning, waste management, asset management, regeneration, procurement and transport planning officers. The detailed basis for scoring, plans of each site and outcome of the exercise are provided at Appendices 2 and 3.

The sites which met most of the criteria overall were graded as green. Amber sites had more uncertainty. In simple terms, the green sites are those which, on balance, the workshops indicated could be both deliverable and sustainable whereas the amber sites were judged to have more constraints or be less desirable in terms of overall sustainability. The purpose of this overall grading was to indicate the sites where more detailed investigations should be undertaken at stage 3.

The list of sites identified following this stage is summarised in table 4.1 below.

Table 4.1: Overall grading of sites after Stage 2

Green			Amber		
Site reference		Summary of reasons	Site reference		Summary of reasons
15	North of Pontefract Road, South of Railway and west of M1 J44 (Aire Valley)	Owned by LCC. Vacant brownfield land. Within existing industrial location. Allocated employment with extant outline planning consent for offices. Within main urban area.	20	Area of major remediation including schemes at existing sewage beds and lagoons associated with Knostrop Waste Water Treatment Works (Aire Valley)	Comprehensive remediation is required over extended period and therefore very unlikely to be completed within procurement programme.
16	Bell Hill/Stourton (Aire Valley)	Owned by LCC. Undeveloped land. Located away from sensitive uses. Allocated employment. Within the core urban area.	22	Land south of Pontefract Lane/ELLR and east of Waste Water Treatment Works (Aire Valley)	Prime development site in private ownership. Deliverability within procurement timescales is uncertain
18	Development sites adjacent to Knostrop Waste Water Treatment Works, South of Pontefract Lane (ELLR) (Aire Valley)	Synergy with land owners interests. Undeveloped land Within existing industrial location. Allocated employment. Within the core urban area.	35	Britannia Quarries (Morley)	Currently still in use as a quarry. There is an area with an unimplemented planning permission for a waste transfer station. On the fringe of the urban area. Close to an area of proposed housing.
19	Vacant land areas within Knostrop Waste Water Treatment Works (Aire Valley)	Synergy with land owners interests. Vacant areas of brownfield land. Within existing industrial location. Within main urban area.	36	Howley Park Industrial Estate (Morley)	Close to residential uses. On the urban fringe.
21	Former Skelton Grange Power Station (Aire Valley)	Synergy with land owners interests. Vacant areas of brownfield land. Within existing industrial location. Allocated for employment and with outline planning consent	37	Scott Lane, Morley	Close to proposed residential area. On the urban fringe.

Green			Amber		
Site reference		Summary of reasons	Site reference		Summary of reasons
		for B2 and B8. Within core urban area.			
25	Former Wholesale Markets between Newmarket Approach and Newmarket Lane (Aire Valley)	Owned by LCC. Vacant area of brownfield land. Within existing industrial location. Allocated employment. Within main urban area.	40	Site of sports ground between ring road and Coal Road (Seacroft)	Deliverability within timeframes is uncertain as current proposal is for mixed uses.
38	Nepshaw Lane (Morley)	Undeveloped land. Allocated employment.	41	Tulip Retail Park (Hunslet)	In use as a retail park and deliverability is uncertain because this is its current development value.

*See Appendix 3 for the full assessment

** Pontefract Lane is now closed to through traffic and the ELLR will replace this road.

The green sites were taken forward for further assessment against strategic waste management criteria. Amber sites would only be considered further if none of the sites graded green were considered to be suitable.

4.4 Stage 3: Detailed assessment of sites graded green

This stage undertook a further assessment of the characteristics of each green site using the following criteria taken from PPS10:

- The likelihood of site owners wishing to sell sites and potential acquisition costs.
- Site accessibility in terms of the capacity of the highways network.
- The potential for alternative access (i.e. by rail, canal, river etc).
- A more detailed assessment on the impact on or of surrounding land uses using the detailed criteria provided in Annex E of PPS 10.
- The potential for negative impacts on regeneration objectives and economic investment.

This more detailed analysis was used to undertake a comparative assessment of each site against each criterion, by applying a simple scoring system using a scale of 1-3, with 1 indicating the lowest performance against the criteria. The results of this comparative exercise are shown in tables 4.2 and 4.3 below. This is based on:

- How deliverable the site is. The sites with the highest score are where the risks in obtaining the site are considered to be lower and where land values are no higher than they would be for employment uses. For example, sites owned by the Council, within single ownership and where the development aspirations and credibility of land owners were known with more certainty scored highest.

- Accessibility in terms of highways capacity and safety, new infrastructure requirements and the potential for alternative access.
- The potential to locate sites away from sensitive land uses or to provide mitigation against any impacts. Compatibility with existing surrounding land uses is broken down into 5 categories to reflect Annex E of PPS 10 and covers visual and landscape, amenity, historic environment, natural environment and economic impact.
- Compatibility with future land use change such as through Area Action Plans and key regeneration projects. The scoring assessment was undertaken for visual impact, amenity and impact on regeneration objectives.
- Planning status in terms of existing planning permissions, compatibility with current land use allocations and potential conflict with any proposed changes to existing land use allocations.

More detailed definitions of the criteria and scoring system used at Stage 3 are included at Appendix 4 to this report.

Tables 4.2 and 4.3 indicate that, overall, sites might appear to be reasonably similar but there are differences when the specific characteristics of a site are examined in more detail. Only the Bell Hill site was significantly worse than the other sites on the basis of the scoring exercise. The conclusions from this process, including a more detailed description of site characteristics, are provided in the following section 5.0.

It is important to note that the scores recorded in Tables 4.2 and 4.3 were used to inform a qualitative assessment of the suitability of sites which is detailed within Section 5 of this report and summarised in Table 6.1. It was not considered beneficial to apply weightings to the individual criteria used at Stage 3 of the site selection process, and the total scores shown in the right hand columns of Tables 4.2 and 4.3 are included for information only, and not as the sole basis for identifying preferred sites.

Table: 4.2: Individual Scoring Criteria

Site	Deliverability		Accessibility			Compatibility With Planned and Proposed Land Uses							Planning Status		Score	
	Potential for Acquisition	Indicative Costs	Proximity to Waste Sources	Highways Access	Potential for Alternative Access	Compatibility with Existing Surrounding Land Use					Compatibility with Planned Surrounding Land Uses			Current Planning Status		Existing and Proposed Land Use Allocations

NE: Impact on natural environment.

E: Economic impact on existing business activities

R: Regeneration impact on planned regeneration and development

5 Conclusions

5.1 Introduction

This stage summarises the results of the assessment process and provides conclusions to identify:

- **Suitable sites:** Suitable sites for a SERP or a major waste management facility.
- **Constrained sites:** These sites have a particular constraint which does not rule them out altogether but means they do not represent a preferred option.
- **Unsuitable sites:** Sites not considered suitable either in planning terms and/or due to significant constraints in their deliverability.

In addition to taking into account the comparative scoring at section 4.0, this section also identifies the flood risk zone for each site in terms of PPS 25 (Planning and Flood Risk) based on information from the Leeds Strategic Flood Risk Assessment. Sites within flood risk zones 1 and 2 are identified in table D3 of PPS 25 as been suitable for essential infrastructure such as power generating uses.

The order in which the sites are presented does not indicate any particular preference.

5.2 Suitable sites for a SERP or a major residual waste facility

Former Skelton Grange Power Station (Site Ref 21)

The former Skelton Grange Power Station is owned by the electricity provider RWE n Power. It is 23 ha in size and is therefore capable of accommodating the full SERP or the co-location of a number of facilities. RWE have indicated an interest in exploring the possibility of developing a waste treatment facility as part of their development plans for the site.

The site is strategically located within the Aire Valley, is previously developed land and is already characterised by industrial/utility uses. It is currently relatively isolated from sensitive land uses and is adjacent to the Waste Water treatment works to the north, east and north west and the Aire and Calder Navigation and River Aire to the south. It is allocated in the UDP for employment uses. A major waste facility would be compatible with existing land surrounding land uses and is consistent with the current land use allocation.

The site has an outline planning consent granted for B2/B8 uses. The AVLAAP proposes that this part of the Aire Valley will be retained for employment uses and therefore it would remain a suitable location for a major waste use. The adjoining land would provide a 'new' neighbourhood if proposals in the AVLAAP are delivered. Careful siting, planning and design should ensure appropriate integration with major changes in land use which are proposed on the adjoining land and could be planned as a comprehensive and integrated sustainable community.

The proximity to the Aire and Calder Navigation affords some potential for alternative methods of transporting waste to be investigated. The River Aire runs alongside and between the site and the canal. British Waterways is proposing an inland dock on land south of the canal and south of this site. The site has an advantage in that there may be the future potential for access by barge.

A single file bridge over the river and navigation is currently the only way to and from the site and the existing structure would need to be replaced for the road to be adopted by the Highways Authority. Preliminary investigations indicate that a replacement bridge could cost £10m. However, the involvement of LCC in developing the SERP and potential for involvement by other partners, such as Yorkshire Forward, may provide the potential to lever in public and private funds to replace the bridge which is a key element of infrastructure in delivering the AVLAAP. Knowsthorpe Lane should also provide access to J45 of the M1 but this is currently closed to vehicular traffic. Existing highway access constraints would need to be overcome before the site could be developed for a SERP or major waste facility.

In terms of PPS 25, the site is identified in the Leeds SFRA as been within flood risk zone 1.

In summary the site is considered to be suitable because:

- It is previously developed land within an existing industrial area.
- The site was previously used for power generation and is owned by a major power generating company.
- The site selection process has determined that the site is deliverable in terms of potential acquisition/partnership and the likelihood of obtaining planning permission.
- It is well located strategically to serve the whole city.
- There is the potential for exploring alternative forms of transport access from the canal.
- The main issues are access via Skelton Grange Bridge and compatibility with the proposed new neighbourhood areas. However, it is considered that both these issues can be overcome.
- It is within a low flood risk area.

Development sites adjacent to Knostrop Waste Water Treatment Works, south of Pontefract Lane (Site Ref 18)

These sites are 12.0 ha. of undeveloped land alongside Pontefract Lane/ELLR and owned by Kelda/Yorkshire Water. Potentially there is synergy between an energy recovery facility and the adjoining operational land of Yorkshire Water which is proposed to consolidate as part of the reconfiguration of the whole of their land interests in the Aire Valley. This site might have the potential to provide enough land for a SERP, particularly if adjacent land to the west (currently used by Leeds City Council City Services) could also be made available. Even without this addition it would still be possible to co-locate a number of facilities on these sites. The site is deliverable.

The site is currently allocated for employment uses in the UDP. It is proposed to retain this employment allocation in the AVLAAP. As this location is prominent frontage to the East Leeds Link Road, there could be a perceived impact on the economic and regeneration objectives of the AVLAAP. However, a major waste facility could be sited towards the treatment works.

The site would have excellent strategic highway access to the ELLR. However, there is no potential for alternative access via rail or canal.

The site is within flood risk zone 1.

In summary the site is considered to be suitable because:

- It is previously developed land within an existing industrial area.
- The site selection process has determined that the site is deliverable in terms of potential acquisition/partnership and it meets key planning tests.
- It is well located strategically to serve the whole city.
- There is potential synergy with the surrounding land uses and the land is owned by a major utility provider.
- It has direct access to the East Leeds Link Road once this is completed.
- It is within a low flood risk area.
- The main issue is that there may be a perception that this location could have an impact on the regeneration objectives for the Aire Valley.

Vacant land areas within Knostrop Waste Water Treatment Works (Aire Valley) (Site Reference 19)

The Knostrop Sewage Water Treatment Works contains a number of areas of vacant land, particularly along the western boundary of the site and towards the River Aire. Yorkshire Water has indicated that there may be synergy between waste treatment processes which generate energy and power and the operation of the site. The site is potentially deliverable dependent on which areas of vacant land could be available.

Although the Knostrop works will be reconfigured and a major remediation programme is planned, the site will remain operational land. As such, the potential for conflict with regeneration and economic objectives for the Aire Valley is limited. The development of a major waste facility is consistent with both existing and proposed land use policy.

The possibility of locating a SERP on the site would need to be investigated further and would depend on the precise areas of land available. There may also be the potential to include the adjacent site currently used for the Leeds City Council refuse vehicle depot within any development proposals.

Access to the site would be good to and from the East Leeds Link Road and also potentially from the south over Skelton Grange Bridge (see comments above). It has good highway access but there is no potential for access by rail and canal.

The site is mainly within flood risk zone 1 with the remaining land in zone 2.

In summary the site is considered to be suitable because:

- It is previously developed land within an area currently used for Sewage Waste Water Treatment.
- The site selection process has determined that the site is deliverable in terms of potential acquisition/partnership and it meets key planning tests.
- It is well located strategically to serve the whole city.
- There is potential synergy with the surrounding land uses and the land is owned by a major utility provider.
- It has direct access to the East Leeds Link Road once this is completed.
- It is within a low flood risk area.

Former Wholesale Market between Newmarket Approach and Newmarket Lane (Site Reference 25)

This site is 9.5 ha of underused previously developed vacant land immediately north of Pontefract Lane (East Leeds Link Road). It is the site of a former market and is a flat open site. The land is owned by the City Council and there are no deliverability constraints in terms of land acquisition.

The land is partly allocated for employment in the UDP. It would be possible to site the waste facility away from the East Leeds Link Road frontage and ensure that a major waste facility is compatible with the objectives of the AVLAAP. The development of a major waste facility is consistent with both existing and proposed land use policy.

To the north of the site is the Neville Hill Railway Maintenance Depot. The main issue in terms of surrounding land uses is the proximity to existing housing to the north west and north east of the site. However, the properties to the north east are proposed for employment uses within the EASEL Area Action Plan. Therefore, this would help reduce the potential for any impacts on surrounding land uses.

Access to the site would be good from the East Leeds Link Road and there is also potential for rail access given its proximity to Neville Hill Rail Depot. This depot is subject to separate proposals for rail freight uses.

The site is within flood risk zone 1.

In summary the site is considered to be suitable because:

- It is previously developed land within an existing industrial area.
- The site selection process has determined that the site is deliverable as it is owned by the City Council and it meets key planning tests. There are no outstanding planning permissions on the site.
- It is well located strategically to serve the whole city.
- It has direct access to the East Leeds Link Road once this is completed.
- It is within a low flood risk area.
- The main issue is that there is some housing located close to the boundary of the site. However, it should be possible to overcome this issue and this is also subject to a proposed employment allocation within the EASEL AAP.

5.3 Constrained sites

Nepshaw Lane

This is located off Nepshaw Lane, Morley. It is 30 ha. of flat undeveloped land and would be large enough to accommodate a SERP. Strategically, it is less well located on the fringe of the City than the preferred sites but has good access to the M621/M62. It is allocated for employment uses in the UDP and the site characteristics mean it could be suitable for waste management facilities. The main issues which need to be overcome are land purchase, internal access through the existing industrial estate and siting to ensure that waste management uses do not conflict with the surrounding area. A Local Nature Area is also located in the middle of the site and mitigation to protect this area would be required. The site is also subject to 3 undetermined outline planning applications for business uses. One

of the main issues which remains unresolved is an objection from the Highways Agency regarding capacity at the motorway junction. Therefore, it is uncertain that a major waste facility could be delivered at the site within the project timeframes. This is in addition to that it does not have the same strategic advantage in terms of its location.

The strategic disadvantage of this location and greater uncertainty on deliverability than other sites due to multiple ownership means that it is considered to have greater constraints. There is also a question of whether other types of employment uses represent a more appropriate land use for this site, particularly as the City Council is concerned about the loss of employment land in this area. However, as waste uses are similar to employment uses in characteristics this should not automatically represent a reason to discount the site.

In summary, the site is considered to be constrained because:

- It is within multiple ownerships and is subject to undetermined planning applications. As such, there is greater uncertainty regarding its deliverability within the project time frames.
- It is more remotely located in terms of access to the rest of the City and there are access constraints due to the impact of development on the Strategic Road Network.
- There is a shortage of employment land within the Morley Area and it could be argued that it is more appropriate to retain this land for 'traditional' employment uses and not waste development activity.

Land north of Pontefract Road, south of railway and west of M1/J44 (Aire Valley) (Site Reference 15)

The land is owned by Leeds City Council but is limited in size due to parts of the site being protected for environmental use and the remainder been remodelled and raised to accommodate office development on the 3 platforms, which was funded by grant aid, via SRB and Yorkshire Forward.

The site would have direct access to Pontefract Road and good access to the M1 via J44.

The site is close to, but not adjacent to the railway. so it remains unlikely to afford rail access due to the topography and intervening environmental uses.

As only 4.6. ha of land is available for development, this means it would not be possible to provide a SERP on the site. The site also already has outline planning permission for office uses and a number of potential occupiers are interested in purchasing the site. Given that this site has already been prepared for office development and a number of occupiers are interested, it is not considered appropriate to 'sterilise' the immediate development potential of the site for a further period of time by identifying it as a potential waste site. This is particularly the case given that this study has identified other alternative major waste sites which are considered to be more suitable.

In summary the main constraint for this site is:

- Although the site could be suitable for a major waste facility, it would not be large enough for a SERP. However, identifying the site for a waste use

would sterilise development activity. As external grant funding has been used to prepare the site for offices and it has outline planning consent for this use, it is considered appropriate to release this site for this use.

5.4 Unsuitable sites

Bell Hill/Stourton (Site Reference 16)

This site is small and triangular in shape (3.6ha) and surrounded by the M621, A61 and the A639 on all sides. The land is undeveloped but allocated for employment uses in the UDP. It is isolated from other surrounding uses and is visually prominent from the Leeds Valley Park office development. There are no extant planning permissions and the land is owned by LCC.

Although strategic access to the site may appear to be good, the site access itself from the A61 is very problematic. A highways feasibility study was undertaken by Leeds City Council in May 2004 and this confirmed that it could cost up to £1 million to overcome the access issues. A roundabout is also highlighted as the preferred solution by LCC but this would result in the loss of development land from the site. As such, this severely limits its potential for a major waste facility as only a small area of land would be available.

In summary, this site is considered unsuitable because:

- Detailed investigations show that access constraints would result in much of the developable part of the site being lost to provide new access arrangements. Given that the site is not very large, this is considered to be an overriding constraint.

6 Recommendations

6.1.1 Aire Valley

PPS 10 and the emerging RSS are clear that the favoured locations for major waste facilities are:

- Areas characterised by existing industrial uses.
- Previously developed land.
- Sites well located in terms of proximity and strategic access to waste arisings.
- Potential for access by rail and water.
- Would not give rise to conflicts with surrounding land uses.

The Aire Valley has two distinct advantages for major waste facilities. First, there is a choice of alternative sites which might be suitable for a SERP. Even if a SERP is not deliverable on a single site, the fact there are a number of suitable sites means the co-location of facilities on different sites within close proximity to each other is feasible.

For these reasons, the Aire Valley provides the best location to either provide a SERP on a single site or to co-locate facilities as advised in PPS 10 and the emerging RSS. It also meets the criteria for the location of waste management facilities set out in both national and regional guidance.

Whilst the impact on economic development and regeneration represent important considerations, the amount of land available for development in the Aire Valley means it is possible to take coordinated action to ensure that the economic and regeneration potential of the area is not compromised. The companion guides to both PPS 10 and PPS 12 makes it clear that Area Action Plans should consider all land uses including waste.

It should be recognised that such uses could make a positive contribution towards creating a sustainable environment for example through recovering waste to supply heat and power to both existing and new land uses.

6.1.2 Outside the Aire Valley

The main alternative site for a SERP outside the Aire Valley is identified at Nepshaw Lane, Morley/Gildersome. This does not, however, have the same strategic advantages as the sites within the Aire Valley. Whilst sites outside the Aire Valley have been given equal consideration in this City wide search, the assessment undertaken provides the evidence to support the Aire Valley as the preferred strategic location for a major waste use by virtue that:

- The characteristics of the Aire Valley meet all the key tests outlined in PPS 10 with regards to access (including the potential for road and canal access on some sites), the availability of previously development land, its industrial characteristics (including former power generation sites and existing water treatment uses) and the availability of vacant sites.
- PPS 10 and the emerging RSS also support the co-location of related facilities to avoid unnecessary transportation.

- Having regard to the saved UDP policies, the sites identified in the Aire Valley have the potential to meet all these criteria.
- The AVLAAP now affords the potential for a land use allocation for waste uses the first such opportunity in the LDF programme.

6.1.3 Suitable Sites

The table below reflects the overall conclusions of the study and provides recommendations for the final short list of sites:

Table 6.1: Site Recommendations

	Deliverable	Accessible	Compatibility with Existing Land Uses	Compatibility with Proposed Land Uses	Planning Status
Suitable Sites					
Vacant land within Knostrop SWT	✓	✓	✓	✓	✓
Former Fruit and Veg Market	✓	✓	✓	✓	✓
Development land adjacent to Knostrop Sewage Treatment Works, South of Pontefract Lane	✓	✓	✓	✓	✓
Former Skelton Grange Power Station	✓	✓	✓	✓	✓
Constrained Sites					
Land north of Pontefract Road, south of Railway and west of M1	✓	✓	✓	✓	○
Nepshaw Lane Morley	○	○	✓	✓	○
Unsuitable Sites					
Bell Hill/Stourton	✓	×	×	✓	✓

- ✓ : Study indicates the site is suitable and that any identified constraints can be overcome.
 ○ : Study indicates that further investigation is necessary or a constraint is more difficult to overcome.
 × : Major constraint with little or no scope for mitigation.

Stage 3 - Scoring Criteria Guidance

	0	1	2	3
Deliverability				
Potential for Acquisition.	Land known not to be for sale. Reject outright.	Potential for acquisition not investigated with private landowners.	Private landowners have indicated a willingness to hold negotiations over potential waste development.	Owned by the City Council.
Indicative costs.	Premium or prestige development site. Reject outright.	Present site value for residential uses or high value employment uses (B1).	Present site value for lower value employment (B2 + B8).	Owned by the City Council.
Accessibility				
Indicative proximity to waste sources (strategic location).		Very poor strategic location and transport costs likely to be high (i.e. sites well outside the Urban Area of Leeds).	Reasonably accessible site but not ideal strategic location in terms of waste collection and transfer (i.e. sites at the urban fringe outside the core urban area).	Sites within the urban core and centrally located to serve all parts of the City.
Highway Access.	Overriding constraint to development. Reject outright.	Major highway access or capacity constraint which is very difficult to overcome and limits the site potential.	There are highway access or capacity issues but possible solutions have been investigated and are feasible.	Limited constraint as there are no identified access or capacity issues.
Potential for alternative modes of transport.		No potential for alternative transport access.	Potential for either rail or canal access.	Potential for both rail and canal access.
Compatibility with Existing Land Uses				
Visual impact on existing land uses.		Potentially a major visual impact on the sensitivity of existing surrounding land uses.	Minor visual impact on the sensitivity of existing surrounding land uses.	It should be possible to fully integrate the facility with existing land uses.
Amenity impact on existing surrounding land uses.	Physically adjoins existing residential properties or other sensitive land uses. Reject outright.	Close to an existing residential area or other sensitive uses and limited potential to create buffer zones/screening.	Potential to create a buffer zone or screen from existing properties or other sensitive land uses.	Within an area dominated by existing industrial uses.
Historic environment.		Would have a major adverse impact on a listed building or its setting or other cultural	Would have a minor impact on a listed building on a listed building or its setting or other cultural heritage	Would have no impact on a listed building on a listed building or its setting or other

APPENDIX 4

	0	1	2	3
		heritage asset.	asset or impacts which could be mitigated.	cultural heritage asset or impacts could be mitigated.
Natural environment.		Would have a major adverse impact on protected species or other sensitive aspects of the environment.	Would have a minor impact on protected species or other sensitive aspect of the environment or impacts which could be mitigated.	Would have no impact on protected species or other sensitive aspect of the environment.
Economic Impact.		It could have a major economic impact on the operation and viability of existing business activity.	There may be a perceived impact on existing business activity which could affect confidence and lead to objection.	There is unlikely to be actual or perceived adverse impacts on existing business.
Compatibility with Planned Land Uses				
Visual impact on existing or planned land uses.		Potentially a major visual impact on the sensitivity of planned surrounding land uses.	Minor visual impact on the sensitivity of planned surrounding land uses.	It should be possible to fully integrate the facility with existing or planned surrounding land uses.
Amenity impact on planned surrounding land uses.		Close to a proposed residential area or other sensitive uses and limited potential to create buffer zones/screening.	Potential to create a buffer zone or screen from planned housing development or other sensitive uses.	Within an area which will remain dominated by existing industrial uses.
Regeneration.		It could have a major impact on the viability of planned regeneration and development projects.	There may be a perceived impact on planned regeneration and development projects which might affect confidence and lead to objection.	There would be no actual or perceived adverse impacts on regeneration or development objectives.
Planning Status				
Current Planning Status.		Outstanding outline or full planning permission for residential or other high value or prestige uses.	Outstanding outline permission for non office employment or other lower value uses.	No planning permission.
Existing or proposed land use allocations.	Currently allocated for green space etc. Reject outright.	Currently allocated for prestige business uses which it is proposed to maintain.	Currently allocated for employment uses but potential reallocation to residential, other higher value uses or green uses.	Currently allocated for employment uses and planned to retain this allocation.

Unique Site Number	Site Area (hectares)	Address Line/Description	Allocation within UDP	Description	Comments
BEESTON					
1	15.8	LAND ADJOINING AND SURROUNDING ELLAND ROAD STADIUM BETWEEN NORTH OF A643 AND M621	LT5a: Regional and National Sporting Facility	Vacant and underused land in use as car parks/warehousing.	Proposed for major leisure facilities including arena etc
2	6.5	MATTHEW MURRAY HIGH SCHOOL, BROWN LANE	Protected playing pitch and urban green corridor	Within Urban Green Corridor, Community Priority Area. Site includes protected pitches. Adjacent to residential development to the west.	Owned by LCC. School is closing. It is a key regeneration site earmarked for housing and greenspace. Will go forward as part of Holbeck Regeneration.
PUDSEY					
3	10.7	TYERSAL LANE EMPLOYMENT ALLOCATION	Employment, Key Employment Site E4:21 + E8.9	The site is undeveloped	Close to residential development. Access could be an issue. Adjacent the boundary with Bradford. Allocated E4.21 and E8.9 in UDP.
HAREHILLS/ROUNDHAY					
4	7.50	TRENT ROAD TORRE ROAD	Existing employment land	Allocated Existing Employment site E3(B). Large factory to north. Adjacent protected playing pitch and near to residential	Identified in EASEL AAP as a Major Development Site.
5	3.60	LAND ADJACENT AND REAR OF THOMAS GRANBY COLLEGE, ROUNDHAY ROAD	Not allocated	Unallocated. Area mixed residential/general industry/car showrooms. Adjacent to Thomas Danby College.	Recent successful bid for Sport England funding to improve sporting facilities and provide MUGA. The college buildings are no longer fit for purpose and relocation is a possibility.
KNOWSTHORPE/CROSS GREEN					
6	17.0	FORMER RAILWAY SIDINGS BESIDE RIVER AIRE KNOWSTHORPE LANE	Partly allocated for Employment	Adjacent rail & canal. Surrounding uses general industrial. Near to residential development.	Within Hunslet Riverside strategic housing and mixed use area.
7	10.5	RAILWAY BALLAST TIP, KNOWSTHORPE LANE, WEST OF SEWAGE WORKS	Employment		Close to railway line. Allocated for employment uses. Used by Tarmac for aggregate distribution on a long lease.
8	15.2	FORMER COPPERFIELD COLLEGE SITE	Mixed Use	Disused college site	Earmarked for mixed use development, new tech. college. Adjacent residential development.
9	4.5	YARN STREET	None	Unallocated, adjacent canal, existing employment sites adjacent	Within the Hunslet Riverside Strategic Housing Area - application expected shortly for 450 houses.
STOURTON					
10	4.5	DEVELOPMENT LAND OFF INTERMEZZO DRIVE, NORTH OF PONTEFRAC ROAD AND SOUTH OF HAIGH PARK ROAD	Employment	Proposed Employment land E4.49. Close to main road/rail network.	LCC advised JB that development of site had commenced and is unavailable.
11	5.0	LAND ADJACENT SKELTON GRANGE BRIDGE	Unallocated but with a protected playing pitch	Land south and west of Skelton Grange Bridge	British Waterways have acquired site for inland dock and part allocated Greenspace
12	14.4	SITE OF FORMER IMI COPPERWORKS AND YORKSHIRE GLASS FACTORIES, HAIGH PARK ROAD AND WEST OF AIRE AND CALDER NAVIGATION	Unallocated	Previously developed land adjacent to the canal.	Major developer has bought land. LCC expecting residential development. Temporary permission granted at the moment for barrel storage. Proposed housing within AVLAAP
13	3.5	FORMER TAR DISTILLERS SITE, HAIGH PARK ROAD, NORTH OF RAILWAY AND WEST OF AIRE AND CALDER NAVIGATION	Existing employment land	Currently industrial land	In use, privately owned (Stocks Bros). Major access problem. Proposed for housing in AVLAAP so land owner expecting high land values.
14	4.2	FORMER OFFICES AND WORKSHOPS, HAIGH PARK ROAD	Unallocated	Currently vacant and derelict industrial land	Owned by Towngate PLC. Long term aspiration for higher value uses. Also surrounded by proposed residential development.
15	4.6	LAND BETWEEN NORTH OF PONTEFRAC ROAD, SOUTH OF RAILWAY AND WEST OF M1	Employment: E3 B20	Vacant and derelict industrial land.	Owned by LCC. Have spent £1m preparing land for office development. Unimplemented but extant outline planning permission for offices. LCC suggested division of site (east/west) as area in the middle is not available for development.
16	3.6	PONTEFRAC ROAD, BELL HILL (NORTH) STOURTON	Employment E4:25	Allocated Proposed Employment Land. Adjacent motorway.	LCC own site. Leeds Valley Park to south has disassociated itself with this site through design and layout. A temporary tarmac plant has been located there in the past. However, major access constraint that would be extremely costly to overcome and would lose large development area.
17	5.8	INDUSTRIAL PREMISES AT PONTEFRAC ROAD/QUEEN STREET.	Unallocated	Vacant industrial premises	Investigated but site not available
KNOSTROP SEWAGE WORKS					
18	12.0	DEVELOPMENT LAND ADJACENT KNOSTROP SEWAGE WORKS, SOUTH OF PONTEFRAC LANE (WITH POSSIBLE EXTENSION TO LCC OWNED LAND WITHIN CROSS GREEN INDUSTRIAL AREA)	Unallocated	Allocated existing and proposed employment land. Adjacent East Leeds Radial Route. Surrounding uses include general industrial	Could be amalgamated with LCC owned site (current site of City Services offices) as part of site assembly scheme. Owned by Yorkshire Water and adjacent to the Cross Green Ind Est.
19	TOTAL AREA 47.2ha	VACANT LAND AREAS WITHIN KNOSTROP SEWAGE WATER TREATMENT SITE (INCLUDING POSSIBLE EXTENSION AREA AT EXISTING LCC REFUSE DEPOT)	Majority unallocated with a small area of existing employment land	Land within the boundary of the sewage works.	The sewage works is currently been reconfigured but there are existing areas of surplus land within the curtilage of the site. Yorkshire Water has indicated that they could be available for development but the exact areas would need to be defined. Also potential to relocate LCC refuse collection depot to provide an additional 1 ha of land.
20	108.6ha	AREA OF REMEDIATION SCHEMES AT EXISTING SEWAGE BEDS AND LAGOONS AND OTHER SURPLUS LAND AT PONTEFRAC LANE (EAST LEEDS RADIAL) AND KNOWSTHORPE LANE	Key employment site E4:1 and E8:4	Existing STW filter beds within Knostrop STW.	Cost of removing sewage beds £100m+ and timescale for remediation is at least 3 years. Proposed employment and housing area within AVLAAP
SKELTON GRANGE/PONTEFRAC LANE					
21	23.2	FORMER SKELTON GRANGE POWER STATION, SKELTON GRANGE ROAD	Employment: E4:44	Former power station site close to main road & rail network, surrounding uses general industrial.	Owned by RWe Power but they have indicated an interest in utilising the site for electricity production. To facilitate new development a new bridge would need to be built.
22	5.6	LAND SOUTH OF PONTEFRAC LANE AND NORTH OF SEWAGE WORKS	Employment: E4:1, E8:4	Large site, allocated key employment site. South of East Leeds Link Road	Owned by Amec. Proposed for industrial uses within the AVLAAP.
23	18.9	LAND ADJACENT RIVER AIRE, SOUTH OF KNOWSTHORPE LANE AND WEST OF M1	Employment E4:44	Part of former Skelton Grange Power Station adjacent to River Aire.	Owned by Rwe but area adjacent to proposed residential uses in AVLAAP and also proposed as green space as part of new community creation.

Unique Site Number	Site Area (hectares)	Address Line/Description	Allocation within UDP	Description	Comments
24		LAND OF PROPOSED MOTORWAY SERVICE AREA	Employment	Undeveloped land adjacent to the M1	Previously subject to planning application for Motorway Service Area but dismissed on appeal. Part of allocation E4.45, E8.18. Owned by Swayfield. Now part of Skelton Business Park and also proposed for Park and Ride site.
LAND NORTH OF PONTEFRACT LANE					
25	9.5	FORMER WHOLESALE MARKETS, LAND BETWEEN NEWMARKET APPROACH AND NEWMARKET LANE	Partly allocated for Employment (E3C:22)	Partially allocated existing employment land. Adjacent Railway. Surrounding uses General Industrial/Railway sidings.	Development land owned by LCC. Proposed industrial area within AVLAAP. Some residential opposite on the other side of the railway but this is proposed as employment land within EASEL.
26	25.2	THORNES FARM	Employment E3 B:4		Largely developed site, two parcels of land left. Can't really be developed further until the East Leeds Link Road is in place. Further consents are expected for more development. Allocated Employment in UDP (E4.46, E8.15, E8.5). Developed land left would be too close to nearby residential development.
27	45.5	DEVELOPMENT LAND AT SKELTON MOOR FARM	Employment: E4:46	Undeveloped farmland surrounding Skelton Moor Farm.	Proposed for higher value employment uses as prime development land next to East Leeds Link Road. Owned by Halifax Estates.
GARFORTH					
28	23.8	NORTH NEWHOLD LAND ALLOCATIONS	Key Employment Site: E4:13, E8:15	Undeveloped land but key employment site.	Development of 5 industrial and warehouse units commenced on site. (Fusion Point and Fusion Court also have planning permission). Areas of land remain but land owner unlikely to sell as a high profile strategic employment land allocation close to the motorway.
29	8.20	NEWHOLD INDUSTRIAL ESTATE	Employment: E3 B:6	Allocated Existing Employment land. Adjacent Key Employment Site and Green Belt.	Development commenced on site. Any vacant units likely to be too small for major waste use.
30	10.6	MICKLEFIELD BUSINESS PARK ALLOCATION	Employment E3B:22, E3B:21	Area of development land adjacent to mainline railway.	Allocated employment site (E3B.6). Peckfield forms part of wider Village Regeneration Area. Site split into 6 plots - 3 have been developed/have planning approval. Other 3 on market but frozen as LCC/GNER are looking into new rail station & parking. Access may be an issue along with potential for local political objections. Too far away from main urban area for major waste facility but could be suitable for other waste facility.
MANSTON					
31	19.0	VICKERS DEFENCE SYSTEMS FACTORY MANSTON LANE	Partly allocated employment	Partially allocated existing employment.	Planning application submitted for housing at the western end of the site. Access extremely difficult and will remain so until the Manston Link road is developed. However the Manston Link road is seen as a facilitating infrastructure improvement to aid expansion of Thorpe Park. No immediate prospect of site coming forward.
THORPE ARCH					
32	3.7	EXPLOSIVES FACTORY AND STORES AT STREET 7 AND WIGHILL LANE, THORP ARCH	Employment	Allocated Existing Employment. Within established Trading Estate (Thorp Arch).	Ex-munitions WWI factory. Would fail the proximity principle as its located some distance from Leeds.
33	11.8	VACANT LAND AT AVENUE E WEST, THORP ARCH TRADING ESTATE	Employment E3B:22, E3B:21	Partially allocated Existing Employment land. Thorp Arch.	Developed and probably incompatible with the proximity principle.
34	20.3	CHAMPAGNE WHIN WASTE TRANSFER STATION	None	Within designated 'Rural Land' - possibly too far from Leeds and at odds with the proximity principle.	Too far from Leeds to be considered acceptable under the proximity principle.
MORLEY					
35	18.4	BRITANNIA WOODKIRK QUARRY BRITANNIA ROAD, WEST OF A6029 AND NORTH OF M62, MORLEY	Minerals	Operational quarry but surplus land adjacent with an unimplemented planning permission for a waste transfer station.	Application expected for the infilling of the quarry. Waste Recycling Group has outstanding permission for WTS.
36	5.7	HOWLEY PARK INDUSTRIAL ESTATE, LAND WEST OF HOWLEY PARK ROAD EAST, MORLEY	Employment: E3C:10	Vacant industrial land. Partly adjoined by existing residential uses.	Part allocated employment site. Subject to application for residential uses which was rejected on appeal due to the loss of employment land.
37	4.2	SCOTT LANE OFF A650 MORLEY	Employment: E4:47		Allocated Employment (E4.47) but close to residential development and UDP allocated housing site.
38	30.00	NEPSHAW LANE	Employment: E4:14 and Local Nature Reserve	Currently undeveloped site with part of the site having nature conservation value (but this can be excluded from the development area).	Site in 3 different ownerships. Improvement to motorway junction would be required. B1, B2, B8 and hotel uses discussed in past. Good location. Allocated in UDP for Employment (E4.14).
39	4.80	GELDERD ROAD	Employment: E4:36		Adjacent cemetery. 2 previous waste uses and allocated employment (E4.35).
MISC					
40	3.50	SITE OF SPORTS GROUND IN BETWEEN RING ROAD (SEACROFT) AND COAL ROAD	Employment: E8:6	Allocated Existing Supply of Employment Land (E8.6). Surrounding uses largely industrial. Very prominent position on Ring Road.	LCC aim to preserve site availability for full range of employment uses. Interest from developer for mixed use, but no formal application made.
41		TULIP RETAIL PARK, BEZA ROAD	Unallocated	Unallocated. Developed. Adjacent Urban Green Corridor and Green Space, also within Community Priority Area	Retail park on a prominent site but having difficulty letting units due to restrictive condition. Good access.
42	14.7	WOODSIDE QUARRIES	Key employment site E4:18, E8:8 and urban green corridor		Owned by Burford Group. Planning application for housing, employment and other associated uses.

Unique Site Number	Site Area (hectares)	Address Line/Description	Deliverability	Site Characteristics	Existing and future surrounding land uses	Accessibility	Grading
BEESTON							
1	15.8	LAND ADJOINING AND SURROUNDING ELLAND ROAD STADIUM BETWEEN NORTH OF A643 AND M621	Allocated for higher value uses.				
2	6.5	MATTHEW MURRAY HIGH SCHOOL, BROWN LANE	Owned by LCC.	Previously developed land and buildings	Key site for the regeneration plans for Holbeck.		
PUDSEY							
3	10.7	TYERSAL LANE EMPLOYMENT ALLOCATION	Land is available for development.	Greenfield site but allocated for development	Surrounded by existing residential uses. Mitigation very difficult.		
HAREHILLS/ROUNDHAY							
4	7.50	TRENT ROAD TORRE ROAD	Part of mixed use site in Easel AAP preferred options. Unlikely to be available for development within timeframes.				
5	3.60	LAND ADJACENT AND REAR OF THOMAS GRANBY COLLEGE, ROUNDHAY ROAD	Sports ground has received funding to be upgraded.				
KNOWSTHORPE/CROSS GREEN							
6	17.0	FORMER RAILWAY SIDINGS BESIDE RIVER AIRE KNOWSTHORPE LANE	Proposed for higher value land uses as part of housing regeneration corridor.				
7	10.5	RAILWAY BALLAST TIP, KNOWSTHORPE LANE, WEST OF SEWAGE WORKS	Used by Tarmac on a long lease.				
8	15.2	FORMER COPPERFIELD COLLEGE SITE	Proposed for higher value land uses including housing				
9	4.5	YARN STREET	Housing development is proposed.				
STOURTON							
10	4.5	DEVELOPMENT LAND OFF INTERMEZZO DRIVE, NORTH OF PONTEFRACT ROAD AND SOUTH OF HAIGH PARK ROAD	Site has been developed.				
11	5.0	LAND ADJACENT SKELTON GRANGE BRIDGE	Proposed for inland dock.				
12	14.4	SITE OF FORMER IMI COPPERWORKS AND YORKSHIRE GLASS FACTORIES, HAIGH PARK ROAD AND WEST OF AIRE AND CALDER NAVIGATION	Developer bought land in anticipation of higher values. Not likely to sell land within project timescales.				
13	3.5	FORMER TAR DISTILLERS SITE, HAIGH PARK ROAD, NORTH OF RAILWAY AND WEST OF AIRE AND CALDER NAVIGATION	Developer bought land in anticipation of higher values. Not likely to sell land within project timescales.				
14	4.2	FORMER OFFICES AND WORKSHOPS, HAIGH PARK ROAD	Proposed for higher value land uses. Unlikely to sell within timescales.				
15	4.6	LAND BETWEEN NORTH OF PONTEFRACT ROAD, SOUTH OF RAILWAY AND WEST OF M1	Owned by LCC.	Previously developed land and buildings	Mixed employment and General Industry/Warehousing.	Within main urban area	
16	3.6	PONTEFRACT ROAD, BELL HILL (NORTH) STOURTON	Owned by LCC.	Greenfield site but allocated for development in current UDP.	Proposed green space in AVLAAP but no other sensitive surrounding land uses.	Within main urban area	
17	5.8	INDUSTRIAL PREMISES AT PONTEFRACT ROAD/QUEEN STREET.	Agent approached. Site is not available.				
KNOSTROP SEWAGE WORKS							
18	12.0	DEVELOPMENT LAND ADJACENT KNOSTROP SEWAGE WORKS, SOUTH OF PONTEFRACT LANE (WITH POSSIBLE EXTENSION TO LCC OWNED LAND WITHIN CROSS GREEN INDUSTRIAL AREA)	Yorkshire Water has indicated a potential interest in developing a major waste use.	Previously developed land and buildings CHECK IF THIS IS THE CASE WITH RA	General Industry/Warehousing in AVLAAP	Within main urban area	
19	TOTAL AREA 47.2ha	VACANT LAND AREAS WITHIN KNOSTROP SEWAGE WATER TREATMENT SITE (INCLUDING POSSIBLE EXTENSION AREA AT EXISTING LCC REFUSE DEPOT)	Yorkshire Water has indicated a potential interest in developing a major waste use.	Previously developed land and buildings	Sewage works and operational areas following remediation and reconfiguration of the rest of the site.	Within main urban area	
20	108.6ha	AREA OF REMEDIATION SCHEMES AT EXISTING SEWAGE BEDS AND LAGOONS AND OTHER SURPLUS LAND AT PONTEFRACT LANE (EAST LEEDS RADIAL) AND KNOWSTHORPE LANE	Currently subject to 3 year clearance remediation programme and comprehensive remediation programme required for the whole site. This makes it very unlikely that this could be achieved within the procurement timescales.	Previously developed land and buildings	Some land will be retained as industrial areas.	Within main urban area	Remediation process means the site is unlikely to be available within procurement timescales.
SKELTON GRANGE/PONTEFRACT LANE							
21	23.2	FORMER SKELTON GRANGE POWER STATION, SKELTON GRANGE ROAD	Owned by Rwe and indicated interest in waste proposal	Previously developed land and buildings	Existing industrial area. Western area proposed for general industry in AVLAAP but parts of the site to the east proposed for housing and new community facilities.	Within main urban area	
22	5.6	LAND SOUTH OF PONTEFRACT LANE AND NORTH OF SEWAGE WORKS	Owned by Amec.	Greenfield site but allocated for development.	Proposed general industry/warehousing in AVLAAP	Within main urban area	Suitable site but deliverability is uncertain.
23	18.9	LAND ADJACENT RIVER AIRE, SOUTH OF KNOWSTHORPE LANE AND WEST OF M1	Owned by Rwe	Previously developed land and buildings	Proposed as riverside green space in AVLAAP but also adjoins proposed new residential area so dismissed due to cumulative impact		

Unique Site Number	Site Area (hectares)	Address Line/Description	Deliverability	Site Characteristics	Existing and future surrounding land uses	Accessibility	Grading
24		LAND OF PROPOSED MOTORWAY SERVICE AREA	Part of Skelton Business Park proposal and proposed for high value employment uses and park and ride site.				
LAND NORTH OF PONTEFRACT LANE							
25	9.5	FORMER WHOLESALE MARKETS, LAND BETWEEN NEWMARKET APPROACH AND NEWMARKET LANE	Owned by LCC	Previously developed land and buildings	General industry/warehousing in AVLAAP. Adjoining residential area allocated for employment in EASEL	Within main urban area	
26	25.2	THORNES FARM	Owned by LCC	PDL land and buildings	General Industry/Warehousing in AVLAAP but areas remaining for development would be too close to residential properties.		
27	45.5	DEVELOPMENT LAND AT SKELTON MOOR FARM	Prime development land in private ownership and unlikely to be able to purchase.				
GARFORTH							
28	23.8	NORTH NEWHOLD LAND ALLOCATIONS	Outstanding proposals mean uncertainty in terms of deliverability				
29	8.20	NEWHOLD INDUSTRIAL ESTATE	Development commenced				
30	10.6	MICKLEFIELD BUSINESS PARK ALLOCATION	Land is available for development.	Amber-Greenfield site but allocated for development.	Site opposite the railway so there are few alternative potential sites for railway park and ride.	Outside urban area	
MANSTON							
31	19.0	VICKERS DEFENCE SYSTEMS FACTORY MANSTON LANE	Planned housing scheme which is likely to get planning permission.				
THORPE ARCH							
32	3.7	EXPLOSIVES FACTORY AND STORES AT STREET 7 AND WIGHILL LANE, THORP ARCH	Available employment site.	Previously developed land and buildings	Within area characterised by existing industrial uses but within rural setting.	Outside urban area.	
33	11.8	VACANT LAND AT AVENUE E WEST, THORP ARCH TRADING ESTATE		Previously developed land and buildings	Within area characterised by existing industrial uses but within rural setting.	Outside urban area.	
34	20.3	CHAMPAGNE WHIN WASTE TRANSFER STATION	Existing waste site owned by LCC.	Previously developed land and buildings	Within area characterised by existing industrial uses but within rural setting.	Outside urban area	
MORLEY							
35	18.4	BRITANNIA WOODKIRK QUARRY BRITANNIA ROAD, WEST OF A6029 AND NORTH OF M62, MORLEY	Quarry in use and outstanding consent for a WTS. Could be worth pursuing.	Previously developed land and buildings	Within an area characterised by minerals, waste and industrial areas but adjoins residential areas and UDP housing land allocation	Urban fringe	Is worth investigating further if other better located proposals were not available
36	5.7	HOWLEY PARK INDUSTRIAL ESTATE, LAND WEST OF HOWLEY PARK ROAD EAST, MORLEY	Available employment site.	Previously developed land and buildings	Residential properties adjoin part of the site boundary which make the site more difficult to develop and mitigate against.	Urban fringe	Close to residential uses and at urban fringe
37	4.2	SCOTT LANE OFF A650 MORLEY	Available employment site.	Greenfield site but allocated for development	Close to existing residential area and allocated housing site to the east.	Urban fringe	Close to proposed residential uses and at urban fringe
38	30.00	NEPSHAW LANE	Available employment site.	Greenfield Site but allocated for development	Adacent to motorway and could be sited away from residential uses	Urban fringe	
39	4.80	GELDERD ROAD	Available employment site.	Greenfield site but allocated for development	Close to sensitive uses-could be perceived to be an insensitive location for this type of use.		
MISC							
40	3.50	SITE OF SPORTS GROUND IN BETWEEN RING ROAD (SEACROFT) AND COAL ROAD	Owned by LCC?	Greenfield site but allocated for development	Surrounded by commercial industrial development but proposed for mixed uses.	Within main urban area	Proposed for mixed uses
41		TULIP RETAIL PARK, BEZA ROAD	Ownership unknown but present value as a retail use making acquisition difficult.	Previously developed land and buildings	Surrounded by industrial uses.	Within main urban area	Retail values make site difficult to acquire
42	14.7	WOODSIDE QUARRIES	Land subject to other alternative proposals.				

Stage 2: Long List Scoring Criteria.

Land and planning issue	Planning policy Basis	Detailed considerations	Grading parameters	Outcome
site availability	Paragraph 18 of PPS 10 is clear that Waste Planning Authorities should avoid unrealistic assumptions on site ownership when allocating sites having particular regard to any ownership constraints which cannot readily be freed.	Is the site owned by the Council?	Green	To determine if the site is likely to be available for development and what action may be necessary to acquire the site.
		Is it a vacant building or derelict site for sale or rent?	Green	
		Private land owner but known to be interested in selling land.	Green	
		Status of the landowner and their development interests are not known and require further investigation.	Amber	
		Status of the landowner and their development interest is known and very unlikely to sell the land/or potential land values are likely to be prohibitive to the council. Deliverability in project time frames is uncertain.	Red	
		An existing planning permission or current live planning application which would preserve the status of the site for higher land values meaning the site is unavailable in the timeframe.	Red	
Site Characteristics	Paragraph 21 (ii) of PPS 10 seeks to give priority to the reuse of previously developed land but also ensure overriding development constraints are avoided.	Is it previously developed land?	Green	To indicate compatibility with planning policy which promotes the reuse and recycling of derelict or vacant land and buildings but also to make realistic assumption about potential deliverability.
		Not previously developed land but is allocated for industrial development.	Amber	
		Not previously developed and not allocated for development	Red	
Existing and future surrounding land uses	Paragraph 21 (i) of PPS 10 states that the suitability of sites should be assessed against the physical and environmental constraints on development, including existing and proposed land uses including all the criteria listed in Annex E.	Within an existing industrial area which will remain characterised by industrial uses and no planned changes to the types of surrounding land uses.	Green	Land uses such as housing, offices, retail, medical facilities and schools are more sensitive to the operation of a major waste facility than other uses such as industrial uses.
		New land uses are planned in the surrounding area but there is no reason why a major waste facility cannot be sited so a conflict does not occur.	Green	
		Impact on existing or planned surrounding land uses which could potentially be reduced to an acceptable level through mitigation.	Amber	
		Close proximity to existing or planned sensitive land uses. The operational characteristics of a major waste facility is likely to give rise to unacceptable visual, amenity and nuisance issues which could not be reduced through mitigation.	Red	
Strategic Accessibility	Paragraph 21 (i) requires the sustainable movement of waste and products arising from resource recovery	Within the core Leeds urban area and good strategic access to the whole City	Green	To determine sites with good strategic accessibility, i.e. close proximity to waste arisings in terms of the best strategic locations to serve the whole population.
		On the urban fringe with less central strategic access to all parts of the City	Amber	
		Outside the main Urban Area of Leeds and poor strategic access to the whole City	Red
