Providing premier electrical contracting services both regionally and nationally.

Highly skilled in house installation engineers. Incorporating the full range of engineering and contracting services: Commercial / industrial electrical installations, IT services, Fire alarms and Building management systems.

We carry out Electrical Installation and Building Management contracts throughout the UK for various clients in the industrial, commercial, education and public sectors. Our recent projects are : Mercedes Benz – New showroom. Education Leeds – Fire alarm Installation to 13 Primary School. Leeds City Council – Millennium Square Lighting etc.

We use the SCMS system for receipt and download of pre-tender notices, tenders, tenders amendment notices and checking out additional enquires. The system speeds up communication and guarantees that we received and send information without postal concern. Environmentally it saves on carriage and paper as the information can be read on screen.

SCMS notifies firms of all up coming opportunities and all the relevant details are available for all firms to see so they can peruse Tenders with other organisations.

The most obvious benefit of the e-tendering system is the easy access to all the relevant information to enable most appropriate tendering. Cost and time savings are made as the majority of the work can be done without hard copies, which is also environmentally friendly.

We find the SCMS website extremely helpful and easy to use to undertake E tendering.

We found the SCMS site saves us time and money, is simple to use and we will continue to use it in the future.

**Kingfisher**

Quality you can afford

Kingfisher has a long and proud history of delivering high quality products and outstanding customer service. We've been a major force in home improvements since 1989, and thanks to the loyalty of thousands of satisfied

customers, we're now one of the leading suppliers and installers of windows , conservatories and doors in the Yorkshire region.

This impressive history, coupled with our good reputation, means you can be more confident about our financial stability than that of some of our competitors – a particularly reassuring benefit in the current climate.

And to make sure you're totally confident about the decisions you make, we created the unique Window and Conservatory Lifestyle Centre, where you can see and feel our products up close. So whether you're looking for a cosy conservatory for reading in peace, or a glass dining room for elegant entertaining, you'll find you're perfect match at the Kingfisher Window and Conservatory Lifestyle Centre. The Centre is open weekdays from 9am until 6pm and weekends from 10am until 4pm.

Our 'Added Value' division was launched to bring together a wide range of specialist Kingfisher products and services that stand as an important addition to our range. They will be of particular benefit to homeowners, people with disabilities, schools, housing associations, local authorities, hospitals and local businesses. Kingfisher provide a comprehensive range of plumbing, carpentry, electrical and building services, window maintenance , access controls , disability adaptations , flyscreens and bi-fold doors

We find the SCMS website extremely helpful and easy to use to undertake E tendering.

SCMS notifies firms of all up coming opportunities and all the relevant details are available for all firms to see so they can peruse Tenders with other organisations. ## Hobson & Porter Ltd

Hobson & Porter is a medium sized contractor based in Hull employing around 150 people and an annual turnover of around 25 million. We work for a variety of clients throughout the Yorkshire and Humber region. These include local authorities such as East Riding, York, North Lincolnshire and Leeds City Council. We specialise in the Housing Sector, and have worked on new build and refurbishment projects for local authorities and housing associations including place for people and Yorkshire Housing. In recent years we have also developed an expertise in the education sector, with over thirty projects completed. Many of our schemes are carried out on a partnered basis. We pride ourselves on an industry-leading customer satisfaction level of 90% and as a result most of our work is repeat business.

Hobson & Porter has carried out a number of projects for Leeds City Council. This has involved the refurbishment of council owned properties and the regeneration of councils estates. We have been working with the SCMS system since its inception. We log on to the site to download information about tender opportunities, including prequalification questionnaires and tender documents, and we are alerted to any extra information as it arises. We can complete submissions and return them electronically.

Using the SCMS site saves us time and money. We can share information quickly and access it remotely. This means we can complete tenders more quickly and can return them at the touch of a button with conformation of receipt. This saves us all the time normally taken to bind and pack tender documents, obtain proof of postage etc.

We found the SCMS site simple to use and navigate, and we will continue to use it in the future. We hope that the other councils in the Yorkshire and Humber region will use electronic tendering as standard in the same way that Leeds City Council has done.

Winning new business is never cheap, and any developments that make the contractor's life easier are always welcome!

## Easifall International Ltd

Easifall International Ltd are a leading play area and sports ground design and construction company.

We Operate in the UK, Ireland and as far away as Hong Kong and Malaysia.

Easifall International Ltd have been building innovative and exciting play areas for Leeds City Council for many years and have a reputation for delivering a quality product on time and on budget.

We have found that by using the e-tendering services SCMS [scms.alito.co.uk](http://scms.alito.co.uk) provided by Leeds City Council we have saved both time and money in the tendering process.

The site is simple to use and self explanatory.

By using this service we have gained more time work on a tender. We no longer have to sit frustrated in traffic or find a parking space when trying to get a tender back to the Civic Hall by a specified date.

Our experience with the e-tendering system has allowed us to access more tenders from partner councils and simply being a part of the e-tendering system has proven to be beneficial when meeting with these partners.

For further information please see our website [www.easifall.com](http://www.easifall.com).

Geomatt Building Ltd is a business with over three decades of experience as general building contractors, property maintenance and refurbishment company. Our team has been associated with developed partnerships and delivering building services to major clients such as Health Authorities, Local Authorities, Housing Associates & Corporate Business. From our head office at Morley Leeds we co-ordinate up to 50 building technicians and sub-contractors at various sites across the Yorkshire & Humberside region acting as Principal Contractor.

We strongly believe in building a personal rapport with our customers to develop a better understanding of their requirements and expectations and we guarantee client's direct access to senior managerial staff at all times.

We proudly undertake all types of building work for trading clients, commercial customers and members of the general public which includes insurance work.

We work for a variety of clients throughout the Yorkshire and Humber region included local authorities such as North Lincolnshire, East North East, Calderdale, Compass Properties (Leeds) and Leeds City Council.

Geomatt Building Ltd has carried out a number of projects for Leeds City Council and has proven track record for the safe and efficient completion of all sizes of contracts operating with CHAS Accreditation.

Annual turnover for the year ended 31 March 2009 = £1.7 Million  
Annual turnover for the year ended 31 March 2010 = £878,715.00  
Annual turnover for the year ended 31 March 2011 = £1.2 Million

We have been working with the SCMS system since its inception. The most obvious benefit of the e-tendering system is the easy access to all the relevant information to enable most appropriate tendering. Cost and time savings are made as the majority of the work can be done without hard copies, which is also environmentally friendly.

Horticon Ltd has traded for over thirty years and provides all aspects of hard & soft landscaping and associated works throughout the North West, North Midlands and Yorkshire areas.

In 2005 Horticon Ltd was selected by Salford City Council as a landscape works partner. We implement all types of hard and soft landscaping and associated works throughout the City in accordance with the objectives of the Landscape Framework Charter. Our appointment has also enabled us to support the aims of the Salford Construction Partnership. We have developed our supply chain arrangement with Salford based companies for the purchase of materials and equipment in addition to training and employing local people whenever possible.

We have also formed an agreement with the William Sutton Housing Association to provide environmental improvement works to an existing housing estate on a partnering basis. The works are undertaken on the basis of an annual rolling programme. Costs are agreed at the outset of each phase with the results being measured against predetermined Key Performance Indicators.

Horticon Ltd is accredited by several professional bodies including BALI, CHAS and Constructionline. We have an accredited ISO9001 Quality Management System and ISO14001 Environmental Management System ensuring we deliver a professional and environmentally friendly service with an emphasis on continual improvement.

We use the SCMS system for receipt and download of pre-tender notices, tenders, tender amendment notices and checking out additional enquiries. The system speeds up communication and guarantees that we receive and send information without postal concern.

SCMS notifies firms of all up coming opportunities and allows us to view the relevant details. The most obvious benefit of the e-tendering system is the easy access to all the relevant information to enable most appropriate tendering. Cost and time savings are made as the majority of the work can be done without hard copies, which is also environmentally friendly.

We found the SCMS site saves us time and money, is simple to use and we will continue to use it in the future.

Our origins date back to the early 1920s although the Kier Group of today is the product of a management-led employee buyout from the Hanson Group in 1992. Following a successful flotation on the London Stock Exchange in 1996, the company has grown organically and by acquisition to become a leading force in the UK.

Kier Group is a leading construction, development and service group specialising in building and civil engineering, support services, public and private house building, property development and the Private Finance Initiative (PFI).

We are intent on fully embracing the social and environmental aspects of sustainability as part of everything we do; not just to improve our own performance but to steer and influence change for the better to a wider audience.

The Group employs over 11,000 people worldwide and has an annual revenue of £2.1bn.

By providing our clients with the highest possible quality of service and through sustainable, profitable growth, our vision is to be the most highly respected company in the industry.

Kier find the SCMS website extremely helpful and easy to use to undertake E tendering. SCMS notifies firms of all up coming opportunities and all the relevant details are available for all firms to see so they can peruse Tenders with other organisations.

The most obvious benefit of the e-tendering system is the easy access to all the relevant information to enable most appropriate tendering. Cost and time savings are made as the majority of the work can be done without hard copies, which is also environmentally friendly.

# THOMPSON

Thompson & Co was founded in the 1860's, first as a partnership then incorporated as a limited company in 1943. We have always had a big involvement in the building industry, originally as joiners and undertakers and then from the 1950's we branched out as building contractors and specialist joinery manufacturers.

The level of high standard workmanship at the firm has always been the main goal to our family run business, which is still family run to this day. We have also moved with the times which has been vital in running a successful business for many decades. The firm has gone from the 19th to the 21st century using the latest technology and building methods along side the old one's. This has helped strengthen the company and also lead to keeping up the same high quality workmanship in an ever changing industry.

Our recently completed projects are Leeds General Infirmary - Jubilee Wing A & E Refurbishment, Harrogate District Hospital – New MRI Scanner Ward, Airedale Hospital – Childrens Ward Refurbishment and St Mathews Church (Bradford) – Refurbishment and Glass Cube.

Thompson & Co has carried out a number of projects for Leeds City Council.

Annual turnover for the year ended 31 March 2010 = £3,346,542.00.

We use the SCMS system for receipt and download of pre-tender notices, tenders, tenders amendment notices and checking out additional enquires. The system speeds up communication and guarantees that we received and send information without postal concern.

SCMS notifies firms of all up coming opportunities and all the relevant details are available for all firms to see so they can peruse Tenders with other organisations.

The most obvious benefit of the e-tendering system is the easy access to all the relevant information to enable most appropriate tendering. Cost and time savings are made as the majority of the work can be done without hard copies, which is also environmentally friendly.

We find the SCMS website extremely helpful and easy to use to undertake E tendering. We found the SCMS site saves us time and money, is simple to use and we will continue to use it in the future.

## WHITAKER & LEACH

Whitaker & Leach has been providing solutions in the construction sector since 1946.

Whitaker & Leach is an experienced, multi-skilled contractor that will rise to any challenge.

Suppliers of high quality construction services at a competitive price.

- Joinery, construction and shop fitting
- New build and refurbishment
- Industrial, commercial and local authorities
- Contract and direct projects undertaken

Historically, the strength of Whitaker & Leach has been in high quality refurbishment. For more than 60 years we have worked with local authorities, commerce, architects and other intermediaries, ensuring all contract conditions are successfully achieved, on time and within budget.

New build projects are now a significant part of Whitaker & Leach's portfolio. We work closely with architects and quantity surveyors to provide a complete, flexible design and build service to the client's specification - always with the minimum fuss, on time and within budget.

We find the SCMS website extremely helpful and easy to use to undertake E tendering. SCMS notifies firms of all up coming opportunities and all the relevant details are available for all firms to see so they can peruse Tenders with other organisations.

The most obvious benefit of the e-tendering system is the easy access to all the relevant information to enable most appropriate tendering. Cost and time savings are made as the majority of the work can be done without hard copies, which is also environmentally friendly.

We found the SCMS site saves us time and money and is simple to use. We will continue to use it in the future.

**Whatever your joinery or construction requirements,  
please contact us for help and advice, without obligation.**

For over 30 years Lovell has been working with local authorities and housing associations, helping communities rebuild their identities with confidence and pride. Lovell is an industry leader

and further increased the size and scope of its operations by acquiring an interest in around 100 projects from the administrators of Connaught Partnerships in September 2010. We are able to draw on wide experience, great expertise and unrivalled economies of scale and we benefit from the backing of the Morgan Sindall Group plc, which turns over £2.2 billion. But we never forget that behind the numbers are individuals – residents, tenants, owners, employees - and that their continued satisfaction is our continued success.

People are always at the heart of what we do. Whether that's giving a resident a new outlook on life or an employee the tools to reach their potential, everything we do reflects our passion for providing opportunities for people and communities.

Lovell has over 3,000 committed employees and refurbishes over 18,000 homes per year, most with residents in occupation. We work in partnership with housing associations, local authorities and arms length management organisations (ALMOs) across the UK.

At Lovell we recognise the value of our people. This is why we recruit carefully and why people's potential, commitment and passion are equally as important as their achievements. Once we have the right people, we train and develop them so they can fulfil their potential and make a positive impact on our company and our customers. Our staff have put together a series of [Careers in Construction Case Studies](#) to demonstrate what life is really like in the construction industry.

We are an [equal opportunities employer](#), win [awards](#) for our training and have achieved the [Investors in People](#) standard.

We have been working with the SCMS system since its inception. The most obvious benefit of the e-tendering system is the easy access to all the relevant information to enable most appropriate tendering. Cost and time savings are made as the majority of the work can be done without hard copies, which is also environmentally friendly.

SCMS notifies firms of all up coming opportunities and all the relevant details are available for all firms to see so they can peruse Tenders with other organisations.

Balvac is a leading specialist civil engineering and building refurbishment contractor, undertaking structural repair, refurbishment, strengthening, and protection of civil structures and buildings throughout the UK. We operate as a principle contractor or as a specialist subcontractor on schemes ranging from a few thousand pounds to multimillion pound projects, and have a broad portfolio of specialist skills and capabilities unmatched by our competitors.

Operating in all the main market sectors including; highways, power, rail, utilities, water/waste water, public and private commercial, marine and heritage, we provide asset solutions from survey, budget proposals and design to technical engineering and project delivery.

Our business culture is focused on engineering excellence, innovation and competency, in order to deliver top quality service for our valued customers. Central to this is a culture of health, safety and environmental risk management, which provides safe working environments and a platform for success throughout the business.

Balvac has CHAS safety accreditation, is registered on Construction-line for a range of civil engineering and building activities up to £5 million in value, and has Link-UP approval for a range of activities for the rail industry. Balvac is also Achilles UVDB verified.

We find the SCMS website extremely helpful and easy to use to undertake e-tendering. SCMS notifies us of all up coming opportunities and all the relevant details are available for us to see so we can peruse tenders with other organisations.

The most obvious benefit of the e-tendering system is the easy access to all the relevant information to enable most appropriate tendering. Cost and time savings are made as the majority of the work can be done without hard copies, which is also environmentally friendly.

Colas Ltd is an integrated service provider to the highway and airfield sectors, offering a diverse range of construction and maintenance solutions to the Highways Agency, Local Authorities, Airport Operators, MOD and the private sector. Our areas of expertise include long term contractual arrangements with the Highways Agency and Local Authorities and major civil and airfield projects.

The company operates nationwide with a workforce close to 2000 employees.

A subsidiary of the international Colas group, we can draw upon the global resources and expertise of one of the world's leading transport infrastructure providers.

Working in partnership with Leeds City Council for over 8 years through a variety of different contracts (currently the Highway Works Term Contract, Minor Highways Works Contract and the Carriageway Maintenance Contract), Colas have undertaken various highway maintenance and civil engineering activities, including junction improvements, carriageway resurfacing, footpath upgrades, bus routes, cycle routes, S278 works projects and finally all associated traffic and pedestrian management requirements.

Use of the Alito/SCMS System has proven to be a valuable e-tendering tool and has further supported this partnership allowing information to be easily accessed and downloaded easily. Creating efficiencies and savings in time, energy and resources.

Colas find the SCMS website extremely helpful and easy to use to undertake E tendering.

SCMS notifies firms of all up coming opportunities and all the relevant details are available for all firms to see so they can peruse Tenders with other organisations.
