This form must be completed and handed to the site attendant on arrival at the disposal site.

Name: 

Address: 

Postcode: 

Vehicle Registration Number: 

I confirm that:

I am disposing of Asbestos waste from my own private house. I am not employed to do so by any other person for monetary gain. I understand that false declaration will leave me open to prosecution by the Environment Agency.

All the asbestos waste has been double wrapped in strong polythene and all loose edges sealed with strong broad tape (e.g., duct tape). I have taken all steps as is necessary to prevent the escape of asbestos dust from the waste.

I understand that the advice provided within this leaflet is given in good faith. All activities involving coming into contact with asbestos are taken entirely at my own risk.

Signed: ____________________________ Date: _______________________

PLEASE NOTE: Asbestos disposal is by appointment ONLY. Any waste which is not securely wrapped in strong polythene will be rejected and you will be asked to leave the site.

Asbestos was extensively used as a building material in the UK from the 1950’s through to the mid-1980’s. It was used for a variety of purposes and was ideal for fireproofing and insulation. Any home built before 2000 can contain asbestos. Asbestos materials in good condition are safe unless asbestos fibres become airborne, which happens when the materials are damaged.

Types of Asbestos

White Asbestos Chrysotile

Brown Asbestos Armosite

Blue Asbestos Crocidolite

WARNING: Breathing even the smallest amount of asbestos dust is dangerous. Anyone working with asbestos should take great care to avoid generating dust which could be inhaled by yourself or others.

The advice provided within this leaflet is given in good faith. All activities involving coming into contact with asbestos are taken entirely at the individuals own risk. Further advice is available on the Health and Safety Executive (HSE) website: www.hse.gov.uk/asbestos
Advice on the Removal and Disposal of Asbestos

- Householders are most likely to come into contact with white asbestos (chrysotile), usually in bonded cement roof panels. White asbestos is a Class 1 carcinogen and all precautions should be taken to avoid dust generation and inhalation.
- If you are unsure about the presence of asbestos, you can arrange for an asbestos survey to be undertaken by an approved asbestos consultant. This may help you avoid unnecessary disposal costs. Survey companies can be found via the internet or yellow pages.
- The HSE website provides up to date and in-depth advice for asbestos removal and can be found at www.hse.gov.uk/asbestos

Removing asbestos from your home

- Wear suitable protective clothing, i.e. disposable overalls, gloves and an appropriate disposable dust mask when handling any asbestos.
- Remove asbestos sheets whole wherever possible and thoroughly wet to keep the dust to a minimum. Do not break panels, or slide one on top of another.
- Do not sand down or wire brush asbestos panels.
- Metal fixings should be cut to remove them. Asbestos sheets should not be broken.
- If drilling or sawing is required, use hand tools as opposed to power tools and keep all areas wet to keep dust to a minimum.
- Keep the work area clean and tidy
- Make sure surfaces which may get covered in dust or debris are easily cleaned or are covered with plastic sheeting.
- Wipe up residues with a damp cloth.
- Keep other people and pets out of the area.
- Dispose of used overalls, gloves, masks and damp cloths and any dust with the asbestos waste.
- All asbestos must be double wrapped in strong polythene (1000 gauge) and sealed with strong broad tape (e.g. duct tape) at all edges.

Disposal of Asbestos at Leeds City Council
Kirkstall Road Household Waste Recycling Site

- Asbestos from your home can be disposed of for a charge at Kirkstall Road Household Waste Recycling Site, Evanston Avenue, Kirkstall, LS4 2HR.
- We do not accept any trade asbestos. For disposal of trade asbestos please contact the Environment Agency.
- All deliveries of asbestos must be pre-booked 24 hours in advance with the weighbridge by calling 0113 336 7660, alternatively you can send an email to asbestos@leeds.gov.uk and someone will call you back.
- Disposal costs will be confirmed during booking. A minimum charge applies for loads up to 200KG. Cash and Cards are accepted (no Cheques).
- All asbestos must be double wrapped in strong polythene (1000 gauge) and sealed with strong broad tape (e.g. duct tape). All loose edges and corners must be secure.
- Try not to transport asbestos waste in an enclosed vehicle unless there is a separate cab and cargo bay. If this is not possible then keep windows open during transportation of asbestos to our site.
- Report to the weighbridge on entry to the site for inspection of your load; failure to properly wrap and secure the waste in suitably strong polythene will result in you being turned away from our site.
- Ensure all packages of asbestos are light enough for one person to handle.
- The Asbestos Disposal Note on the back of this leaflet must be completed and handed to the weighbridge on entry to our site.
- You will be required to remove the asbestos from your vehicle and place it in the asbestos skip provided.
- The removal and disposal of asbestos at Leeds City Council sites is undertaken entirely at your own risk.

If you have any questions please call 0113 336 7660 or email asbestos@leeds.gov.uk
