

GULLY CLEANSING PROGRAMME FOR LEEDS 2018- 2020

The tables below show where and when the gully teams have been and will be attending gullies across the Leeds district. The first four gully teams work on a Ward by Ward basis across the city. The fifth team mostly attends to all of service requests that we receive.

Our aim is to attend to all gullies within a two year cycle. Gullies on the A & B classified main roads and those in known flooding areas will be attended to more frequently.

The programme will be subject to alteration during periods of severe weather conditions.

Gully Team 1 and 2							
Ward Name	Number of Gullies	Date From - To	Year	Gullies Cleaned	*Gullies Blocked	** Gullies Not Accessed	Gullies Not Visited
Roundhay	4483	May-Jun	2018	92%	1%	6%	0.00%

***Gullies Blocked** - Identified by the gully teams are passed to our jetting / construction teams who work throughout the year to ensure they are running. This may involve jetting the connection or excavating and replacing a broken pipe.

**** Gullies Not Accessed** (during the programmed period) - Sometimes we are unable to attend gullies due to parked cars or other obstructions. Each gully has a minimum of two visits and then unless there are any other problems with the gully it will be left
